AGRANA AT A GLANCE

Sugar, starch and fruit – AGRANA is successfully active around the world in these three segments. We refine agricultural raw materials, turning them into a range of different industrial products to supply local producers as well as large multinational companies active in the food processing industry, in particular. We also serve the end-consumer market in the Sugar segment with country-specific brands such as 'Wiener Zucker' in Austria.

AN INTEGRAL PART OF MODERN LIFE. The product range extends from sugar for food products, starch for textiles and technical applications to bioethanol as a sustainable and environmentally sensitive fuel, as well as fruit preparations for yoghurt and fruit juice concentrates.

OUR EMPLOYEES ARE OUR MOST IMPORTANT RESOURCE. AGRANA maintains a global presence with around 8,600 employees based at 53 production facilities located on five continents. Their dedication and expertise ensure the company's success.

AGRANA IS A STOCK CORPORATION. The Group has been listed in the Prime Market segment of the Vienna Stock Exchange since 1991. AGRANA most recently generated consolidated revenues of approximately EUR 2.5 billion.

SUSTAINABLE OPERATIONS. In view of our commercial activities and the associated proximity to raw agricultural products, striving for sustainability represents an existential and integral part of AGRANA's business model.

STATEMENT OF THE MANAGEMENT BOARD

Meeting the challenges of the future with three business segments

AGRANA is an internationally-oriented Austrian company which adds value to agricultural raw materials to produce a wide range of industrial products for the processing sector.

Founded as the holding company of the Austrian sugar and starch industry in 1988, AGRANA has successfully transformed to become a company that is active well beyond the borders of Austria, having almost tripled its revenues during this time. Today we are one of the leading sugar and starch companies in Central Europe, the global leader in the manufacture of fruit preparations for the dairy industry and one of the largest producers of fruit juice concentrates in Europe.

Our commitment to high levels of service, innovation and efficiency, which is based on core values such as responsibility and respecting the environment, we are a preferred partner to companies in the food industry and for technical companies.

The issue of sustainability is of particular importance to AGRANA along the entire value-added chain. We attach considerable importance to energy-efficient processes and the almost entire use of agricultural raw materials. With our business model comprising the Sugar, Starch and Fruit segments and our strategy of compensating for volatile underlying conditions across all segments as far as possible, we are well equipped to meet the challenges of the future.

OUR

VALUES WHICH UNITE

At AGRANA, we all share one vision. to be the world quality leader in refining agricultural raw materials into sugar, starch and processed fruits. Our passion for quality and efficiency makes AGRANA the natural choice of food companies and for technical applications worldwide. AGRANA. THE NATURAL UPGRADE.

AGRANA is a multinational enterprise based in Austria. Our Sugar segment and Starch segment operate in Europe and our Fruit segment has global presence. In these markets, AGRANA's goal is to be a leader in the industrial refining of agricultural raw materials.

STRATEGY By means of growth, efficiency and sustainable business practices, we are constantly boosting the company's value added. AGRANA regards sustainable business practices to be consistent with commercial, ecological and social responsibility along the entire value-added chain.

SERVICE TO THE MARKET We add value to agricultural commodities in order to produce high quality foodstuffs, animal feeds and organic fertilisers as well as technical and intermediary products for industrial applications. Important cornerstones here are long-term and partner-oriented customer and supplier relationships.

CUSTOMER ORIENTATION We offer products and services that fully meet the needs and expectations of our customers. We aim to differentiate ourselves from competitors by means of high product quality, outstanding service level, innovative ideas as well as ecological and social responsibility which is reflected in our actions. We are creative, flexible, dedicated and always looking for new markets for our products. Our innovative power and research and development work, together with our new products launches tailored to customer requirements, drive our leadership in the marketplace.

ORGANISATION Our organisation is based on earnings-oriented operational subsidiaries in the Sugar, Starch and Fruit segments. These are overseen by a holding company which undertakes the centralised management of the entire Group and provides support by means of an effective communications network aimed at ensuring a regular exchange of information and the tapping of synergies.

FINANCE Profit constitutes the basis for the economic sustainability of our enterprise's activities. We ensure AGRANA's sustainable increase in enterprise value and the ability to distribute dividends to shareholders through continued growth and consistent improvement in pro-

MISSION STATEMENT

ductivity, as well as through “profitizing” – the constant striving to increase profits and optimise our business processes and structures in all our operating companies. We seek to diversify risks to our business to achieve a well-balanced global business portfolio. Optimising our value added is a cornerstone in our efforts to provide continual increases in the enterprise value of AGRANA.

MANAGEMENT AND STAFF We are a multinational Group of companies. We are united by integrity, dedication and social awareness. We promote the exchange of information, communication, training and continuous staff development. We encourage our workforce to think and act responsibly and entrepreneurially. Each member of staff accepts responsibility for his or her own continuing development. Management ensures that all employees have the opportunities and support necessary for this purpose. Our staff development activities form an integral part of our strategic objectives. Every employee has an important part to play in our company that requires full commitment and that challenges his or her abilities and expertise anew every day. Our style of work and leadership is founded on cooperation and trust. Flexibility and teamwork are fundamental to our organisational structures and interpersonal relationships. Management is paid on the basis of performance.

THE ENVIRONMENT Our actions and decisions are taken with respect for nature and the environment. Our products are sourced from natural origins, developed and produced on the basis of the latest ecologically sensitive processes, which are low-emission and efficient, and are also biodegradable and environmentally friendly. AGRANA aims to rely on a closed economic cycle which ensures that the agricultural commodities used are recycled to an extent of nearly 100%. The health and safety of the workforce are a key priority of our operational policies and procedures.

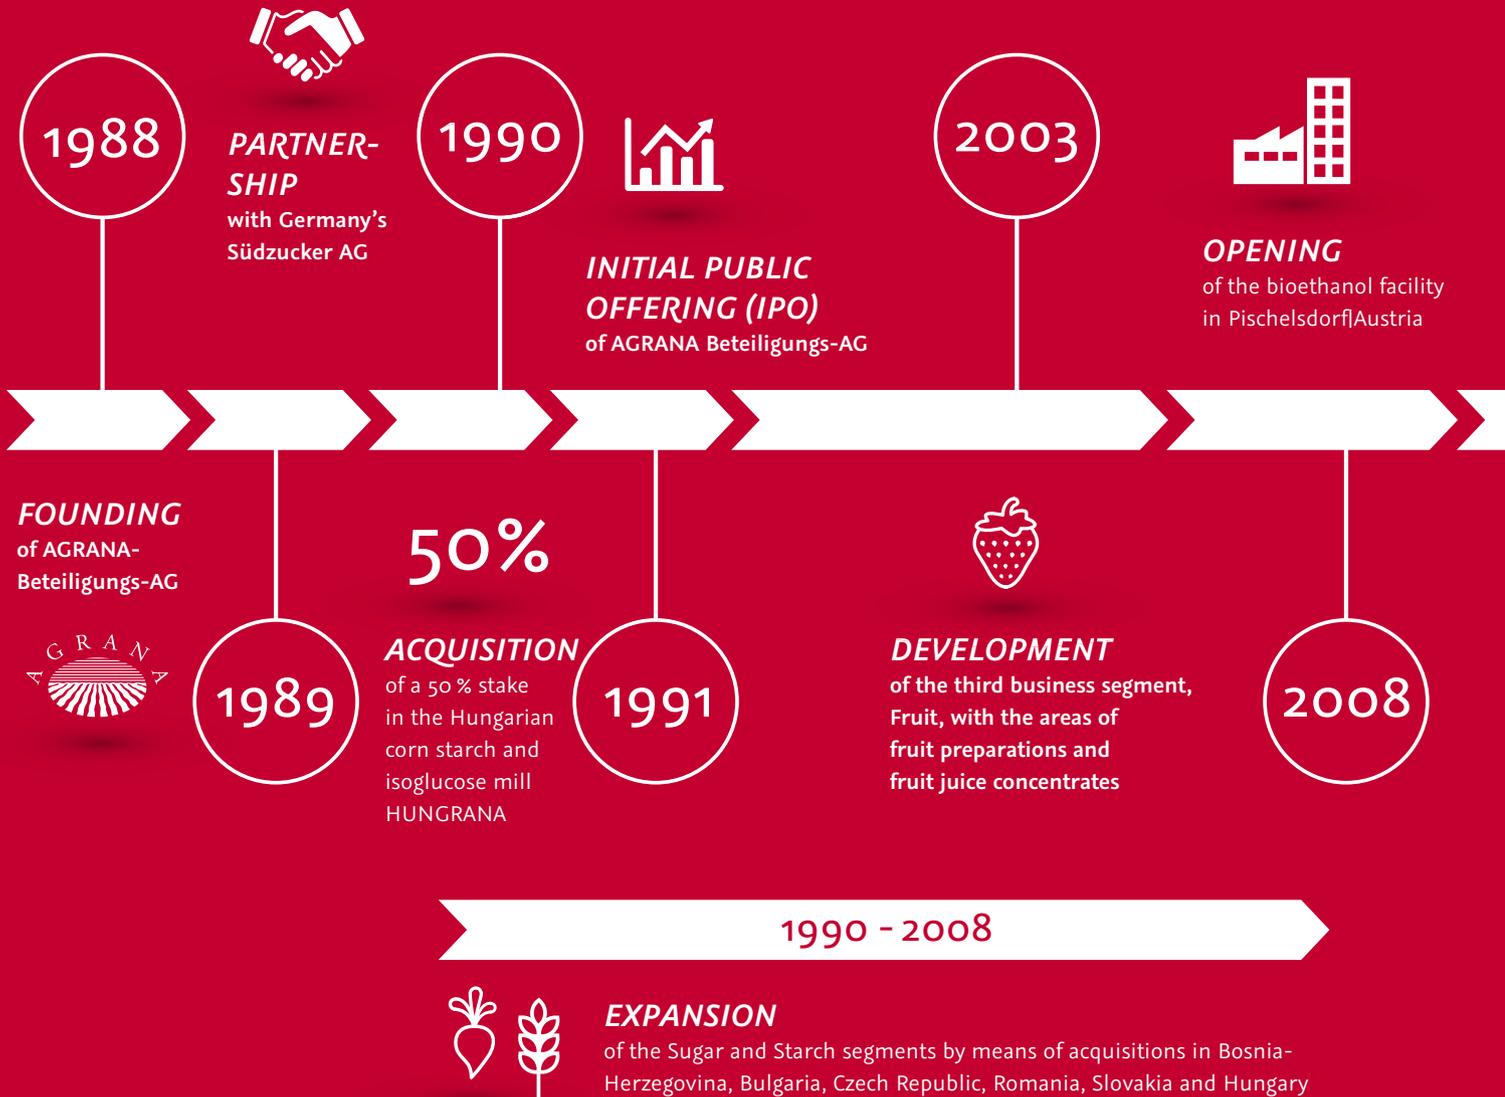

PRODUCT SAFETY Our strict, certified manufacturing standards guarantee the safety of our products for our customers. We focus on continually improving the quality and hygiene standards of the foodstuffs and animal feeds we make. As a commitment to our customers, we strive for full traceability of our products back to their natural sources.

PUBLIC RELATIONS AND TRANSPARENCY We aim to appropriately take into account the interests of the society, in general, and our shareholders, in particular, our workforce, the media, our partners in the marketplace and the general public informed about our goals, activities and results. We strive to maintain our high level of transparency regarding all important innovations and developments.

SUSTAINABILITY

IN HARMONY

WITH THE ENVIRONMENT, PEOPLE AND BUSINESS

AGRANA believes sustainability means acting in an economically viable, sparingly and energy-efficient way, and, in doing so, respecting its internal and external stakeholders.

In view of our commercial activities and the associated proximity to raw agricultural products, acting sustainably represents an integral part of AGRANA's business model. Relevant aspects of sustainability along our product added-value chain start from the sourcing of the agricultural raw materials and intermediary products used, comprising energy and environmental aspects in our own production processes, employee working conditions, aspects of product responsibility and ethical business activities, as well as social commitment.

AGRANA's understanding of sustainability can be summarised by the following statements:

WE

1. **PROCESS ALMOST 100 %** of the agricultural raw materials used, using low-emission technologies to protect the environment
2. **CONSIDER ALL OF OUR STAKEHOLDERS AND THE COMPANIES** in which we are involved
3. **WORK TOGETHER IN LONG-TERM PARTNERSHIPS** with our suppliers and customers

The following points are of particular importance:

SOURCING SUSTAINABLY PRODUCED AGRICULTURAL RAW MATERIALS AND INTERMEDIARY PRODUCTS

AGRANA processes around nine to ten million tonnes of agricultural raw materials per year. When sourcing these, we attach great importance to compliance with minimum social standards and strive to process only raw materials and intermediary products that are produced in accordance with defined environmental criteria.

AGRANA places particular emphasis on sourcing from contract growers as, through close cooperation with our suppliers, they offer us the unique opportunity to work on improving environmental and social standards in the production of the raw materials ultimately used by us. With this in mind, we have been a member of the Sustainable Agriculture Initiative (SAI) since 2014. As an information platform, SAI aims to promote the development and implementation of sustainable agricultural practices by presenting examples of best practice and providing support with a range of different tools such as a self-evaluation for farms.

ENERGY AND ENVIRONMENTAL ASPECTS IN PRODUCTION

AGRANA feels a particular obligation to conserving all natural resources.

One focal area here is the unique and almost entire recycling of raw materials used in the course of making core and by-products. Efficiently handling the agricultural raw materials used is our commercial, environmental and social responsibility. In addition to the known core products, we produce a wide range of secondary products derived from agricultural by-products, which are used as animal feed and agricultural fertilisers. This enables important nutrients and minerals to be returned to natural circulation.

As an energy-intensive processor of agricultural raw materials, particularly in the Sugar and Starch segments, we have always set store by the continuous optimisation of specific energy consumption and the improvement of energy efficiency. We reduce specific greenhouse gas

emissions primarily by improving energy efficiency and using low-emission fuels such as natural gas. We have committed ourselves to continuous improvement in the area of energy through the launch of an energy management system and the certification of our Austrian production sites in accordance with ISO 50001 in autumn 2014.

We also use water as sparingly and efficiently as possible in our production processes. AGRANA does its best to keep the amount of water it takes out of circulation to a minimum and, where possible, to make use of the water contained in the processed raw materials, ensuring constant circulation with corresponding recycling. Waste water is drained in accordance with all local legal requirements after being treated in AGRANA's own or external waste water treatment plants.

PRODUCT RESPONSIBILITY & SUSTAINABLE PRODUCTS

Given that AGRANA primarily makes intermediary products for the food processing industry, food safety and

production protection form a key element of our product responsibility. We go far beyond what is required by law in our efforts to ensure food safety, introducing internationally recognised standards for food safety and product protection in the course of external certification procedures. The most important standards here include FSSC 22000, ISO 22000 and IFS.

In addition to food safety and product protection, AGRANA also pays attention to social aspects in its production. We have therefore been a member of the Supplier Ethical Exchange Database (SEDEX) since 2009. SEDEX is an organisation of companies which have committed to strive for continuous improvement in their social-ethical behaviour and which promote this along their supply chains. All of AGRANA's production sites carry out a SEDEX self-assessment every year. In order to underpin its commitment in this area, AGRANA draws on the services of independent third parties to verify these self-assessments in the course of Four-Pillar Sedex Members Ethical Trade Audits (SMETA). The audit reports of our plants can be accessed by SEDEX members and are available on the online platform of the company.

Sustainable business is an integral element of AGRANA's business model

Segment

SUGA

R

*Did you know that 1kg of sugar is
made from around 6kg of sugar beet?*

AGRANA's sugar segment stands both for tradition and the use of cutting-edge processing technologies. Not only do we supply the processing industry but we also sell our sugar through retailers.

In its traditional core sugar business, AGRANA is active in Austria, Czech Republic, Hungary, Slovakia, Romania and Bosnia-Herzegovina, with nine production sites. We process sugar beet from contract farms and also refine raw sugar procured from around the world. AGRANA also sells a wide range of sugar and speciality sugar products to consumers through retail outlets using country-specific brands. AGRANA's high quality standards for everything ranging from the seeds it uses to sugar production, combined with the absolute traceability and integrity of its product range has made it the market leader in Austria and a top supplier in Central Europe.

AGRANA attaches great importance to close partnerships with beet growers, offering them advice in the cultivation of sugar beet. The quality of cooperation between the sugar industry and growers is, in our view, key to achieving optimum sugar beet yields while maintaining sustainable conditions.

AGRANA is the technological leader in producing sugar from beet. State-of-the-art facilities ensure the highest degree of raw material and energy efficiency.

**70,000
tonnes**

The sugar silo in Tulln/Austria, which was taken into service in 2011, is capable of storing 70,000 tonnes of sugar, making it Europe's second-largest sugar silo.

AGRANA is the technological leader in producing sugar from beet. State-of-the-art facilities ensure the highest degree of raw material and energy efficiency. By way of example, we run a molasses desaccharification plant on a chromatographic basis in Tulln|Austria, as well as the first large-scale biogas plant in Kaposvár|Hungary, where we already generate around 60 % of the primary energy required by the site ourselves from beet foliage and cosettes, and have been feeding biogas into the local natural gas network since autumn 2015. This technological advancement, coupled with an excellent position in its core markets, will ensure the commercial success of AGRANA Sugar.

FACTS AND FIGURES ABOUT SUGAR IN NUTRITION

Sugar is obtained from sugar beet without any additives and is a valuable carbohydrate. Due to the fact that cultivation is regulated and that it is subject to regular quality checks, sugar beet has an unparalleled degree of purity with a saccharose content of almost 100 %. In its natural state, sugar is a natural provider of energy as part of a balanced diet, delivering effective support to the body to meet both physical and mental performance needs. If enjoyed in the proper amount, sugar plays a valuable role in our diet, our ability to perform and, last but not least, our well-being.

OUR *SUGAR PRODUCTS*

AGRANA sugar comprises beet sugar, as well as sugar cane products, for end consumers and industrial processors. Sugar is sold through retail outlets under country-specific sugar brands such as 'Wiener Zucker' in Austria, 'Koronás Cukor' in Hungary, 'Korunní Cukr' in the Czech Republic, 'Korunný Cukor' in Slovakia,

'Mărgăritar Zahăr' in Romania and 'AGRAGOLD' in Bosnia-Herzegovina. As Europe's largest producer of organic sugar, we also offer sugar made from organically grown Austrian beet under the brand 'Wiener Bio Kristallzucker'.

FOR FOOD PRODUCERS AND THE CATERING SECTOR

Segment

STAR

CH

*Starch is used in many products,
from cosmetics to animal feed.*

*AGRANA processes nearly
2 million tonnes of cereals
and potatoes to make
starch every year*

AGRANA specialises in processing and adding value to high quality agricultural commodities such as corn, potatoes and wheat to make a wide range of starch products, tailored to different industrial uses.

The Starch segment is the second traditional pillar of the AGRANA Group, which is one of the leading suppliers in Europe in this segment. AGRANA Starch GmbH oversees the Austrian starch business and coordinates the activities of the subsidiaries and holding companies in Hungary and Romania. In the Starch segment, we are active in Austria and Eastern Europe with a total of five production sites.

AGRANA processes and adds value to corn, potatoes and wheat to make a wide range of differentiated starch products. These are then supplied to the food and semi-luxury food industry as well as to non-food industries such as the paper, textiles, cosmetics or construction material industry. We also produce bioethanol from corn and crops with a high starch content; this is then used as a petrol additive to make environmentally friendly fuel.

Starch is a complex carbohydrate, which is made up of a large number of interlinked glucose molecules. To make starch, the parts of the plants containing starch are crushed, the starch is then washed out of the cells and collected through a number of filtration and centrifugation steps, before finally being dried as a white powder.

Close cooperation with customers and the development of tailor-made solutions has enabled the Starch segment of AGRANA to continuously grow and be commercially successful. The priority is and remains making top quality starch products employing modern and environmentally sensitive methods. An area of focus here is also speciality products made from waxy corn or organic corn, which are produced in the corn starch plant in Aschach a.d. Donaul Austria. The use of SAI farm sustainability assessments (FSA) in potato growing highlights the high status of sustainability in AGRANA's supply chain. For more than ten years now, organically certified potatoes have been turned into organic starch and organic long-life potato products at Austria's only potato starch factory in Gmündl Austria. The wheat starch mill in Pischelsdorf has also been producing organic gluten and organic wheat starch since 2015. AGRANA's keen awareness of top quality has made it the largest manufacturer of organic starch products and the leader supplier of GMO-free starch products.

OUR *STARCH PRODUCTS*

Manufacturing top-quality starch products with modern and environmentally friendly methods – this is the focus of the Starch segment. AGRANA makes high-quality starch products from corn, potatoes and wheat for a range of applications in different industries. The diverse properties of starch find use in the food

industry as well as in technical areas such as construction chemistry, paper and cardboard manufacturing and the textiles industry. Considerable importance is attached to certified organic products and GMO-free products in AGRANA's portfolio of starch products.

*AGRANA fruit preparations can be found
in every third fruit yoghurt worldwide.*

We bring around 600 new and innovative, customised fruit preparations to the market every year

AGRANA is the top global producer of fruit preparations for the dairy industry. Every third pot of yoghurt around the world contains fruit preparations from AGRANA.

In addition to the sugar and starch segments, AGRANA has also been active in the fruit segment since 2003 as part of its global strategy. This segment is divided into the fruit preparations and fruit juice concentrates divisions. In both of these, we use state-of-the-art technology to process fruits by means of sensitive production processes. Given the trend towards healthy nutrition, AGRANA's Fruit segment has developed very positively, helping to drive the company's dynamic growth.

FRUIT PREPARATIONS contain top quality fruit which is prepared either as a liquid or in pieces in order for these to be used mainly in dairy products but also in the ice cream and bakery industries as well as for food services and in the beverages industry. They are designed and developed individually in cooperation with customers.

AGRANA produces fruit preparations at 25 sites around the world. It has been possible to establish this global presence by continually developing emerging international markets in this commercial field. Our sales teams are working for customers in 70 countries. With dedicated company fields

We truly care about fruits – from the moment they are harvested until they reach their final stage in end products.

and exclusive long-term partnerships with our farmers, we have developed a key competitive advantage in terms of price, quality, traceability and sustainability.

THE FRUIT JUICE CONCENTRATE business is run by the AUSTRIA JUICE Group, a joint venture between AGRANA Beteiligungs-AG and Raiffeisen Ware Austria-AG. 900 highly qualified employees work at the 13 production sites in Europe as well as at one plant in China.

The AUSTRIA JUICE Group manufactures a variety of different beverage solutions, from conceptual design to making the finished product. With decades of experience in the sourcing of raw materials, processing fruit and market monitoring, AUSTRIA JUICE is a competent partner when it comes to turning customer-specific product innovations into reality.

Products include natural fruit juice concentrates as well as individual, high-quality beverage compounds, natural flavors, NFC juices and fruit wines. Quality takes top priority during processing and is ensured by means of regular inspections, preventative risk analyses and external certifications. Customers of AUSTRIA JUICE include global players and all customers in the food and beverage industry.

OUR *FRUIT PRODUCTS*

AGRANA refines fruit for customers around the world in the Fruit segment. And this in two ways: as fruit preparations and as fruit juice concentrates. The raw materials for fruit preparations are sourced from around the world and processed while frozen. The fruits are refined in a liquid or solid form for the global food industry using individual recipes.

In the field of fruit juice concentrates, we are specialised in apples and red berries such as strawberries, raspberries or elderberry. These are used to produce beverages compounds, fruit wines, flavors, NFC juices and fruit sweetness in addition to fruit juice concentrates.

OUR

SUCCESS FACTOR: OUR EMPLOYEES

Cooperation, appreciation for different cultures and tolerance are characteristics of the working culture at AGRANA. The AGRANA Group offers its employees an interesting workplace, a motivating working environment and performance-oriented remuneration.

MOTIVATED AND WELL-QUALIFIED EMPLOYEES ARE KEY TO THE SUCCESS OF THE COMPANY.

For this reason, AGRANA focuses on three principles as part of its personnel policy in addition to professional qualifications and soft skills:

THREE PRINCIPLES

- TAKE RESPONSIBILITY AND MAKE DECISIONS
- WORK IN A PERFORMANCE AND RESULT-ORIENTED WAY
- ACT CONSISTENTLY

AGRANA fully believes that cooperation and mutual respect in the working and management style are needed to implement these principles. This is why our employees make key decisions regarding the development of the company on a daily basis. Open communication is the norm at all levels.

PERSONNEL DEVELOPMENT AND TRAINING ARE A HIGH PRIORITY FOR US.

We invest in the market and requirements-oriented training and development of our employees and identify personal needs for individual education and training in the course of regular staff appraisals. This involves AGRANA offering a wide range of internal programmes, for example the focus on the areas of leadership and sales at the AGRANA Academies.

EMPLOYEES

UNIVERSITY GRADUATES ARE SUPPORTED BY THE AGRANA TRAINEE PROGRAMME.

This programme regularly offers young, motivated university graduates the chance to gain professional experience in an international setting. The trainees get to know the company at various sites and receive training in selected areas.

A PERFORMANCE-BASED REMUNERATION SYSTEM SUPPORTS THE ACHIEVEMENT OF STRATEGIC OBJECTIVES.

This system has already been in place for several years at AGRANA and forms an important element of our human resources strategy. The intention is for this to act as a motivator for management and to recognise top performance, therefore contributing to corporate success. Besides financial and earnings-based targets, the performance-based remuneration also includes agreements on individual targets.

AWARDED THE SILVER BEST RECRUITERS SEAL OF APPROVAL 2015/16 AUSTRIA

AGRANA attaches significant importance to respect-based and friendly relations with potential new employees. It is for this reason that we regard being awarded the Silver Best Recruiters seal of approval as a confirmation of our commitment to continuously developing our quality criteria in recruitment when searching for new talent.

A RANGE OF TRAINING POSSIBILITIES

OUR **RESEARCH & DEVELOPMENT**

Product innovation and the continuous optimisation of technologies are at the heart of research and development at AGRANA.

AGRANA's research and innovation work are pooled at the AGRANA Research & Innovation Center (ARIC) in Tulln|Austria. The main areas of work include developing new formulas, speciality products and applications for existing products in close cooperation with customers, in addition to the ongoing optimisation of production technologies.

IN THE SUGAR SEGMENT a range of different research, development and investigative activities are conducted in the areas of sugar production and applications. One focal point of the company's work is developing new, environmentally friendly and energy-saving procedures and process steps to make even more sparing use of energy and additives during sugar production. Assessing the technological quality of sugar beet and improving this form a further focal area of our activities. The focus is on minimising declines in sugar concentrations in beet stored for longer periods and the use of so-called bio-

The AGRANA Research & Innovation Center is the largest industrial food research institute in Austria

stabilisers developed in-house (products based on hops and/or resin acids).

IN THE STARCH SEGMENT, the overriding objective is to develop new application areas for starch-based products and to adapt existing products to specific applications. The main focus of research lies in the development of special starches for use in technical applications and the food industry. These are manufactured by means of customised chemical, enzymatic and physical processes and tested in a practical context. Other focus areas include the development of efficient means to optimise production processes and quality improvement measures.

IN THE FRUIT SEGMENT, the development of new products and innovations represents an integral part of AGRANA's fruit preparation business. Given the short life cycles of fruit yoghurt products, it is important to be able to respond quickly to changes in consumer behaviour, recognise development potential and set new trends. To this end, there are local product development teams in the Research and Innovation Center, as well as an international research and development team, which deals with global innovations. Projects that have a high degree of customer relevance and consumer proximity are developed in cooperation with the AGRANA Fruit marketing team before being rolled out and implemented at AGRANA sites around the world.

ARIC's other cross-sector areas of activity include developing new ways of recycling by-products and process optimisation in the production of bioethanol as well as issues relating to quality assurance and hygiene control.

ORGANIC

BIOPLASTICS

Developing modified thermo-plastic starches for the manufacture of degradable organic plastics

CLEAN-LABEL-PRODUCTS

Developing processes for the manufacture of native starches without the use of chemicals

CONSUMER RELEVANT INNOVATION

Maintaining the natural texture of pieces of fruit while at the same time preserving the fruit's own flavours and colours
