Q1-3 2015/16

INTRODUCTION & BUSINESS OVERVIEW

QUICK FACTS UPDATE

AGRANA

- We refine agricultural raw materials, turning them into a range of different industrial products to supply local producers as well as large multinational companies active in the food processing industry, in particular.
- We also serve the end-consumer market in the Sugar segment with country-specific brands such as "Wiener Zucker" in Austria.

~8,100 employees
(FTEs)

54 production sites

€ 2.5 billion revenue

Leading
SUGAR
manufacturer
in Central, Eastern &
South-Eastern Europe

Major manufacturer of custom
STARCH
products in Europe

World market leader
in the production of
FRUIT
preparations and largest
manufacturer of fruit juice
concentrates in Europe

AGRANA PRODUCTS IN DAILY LIFE

AT A GLANCE

SUGAR

Sugar is sold

- to consumers via the food trade and
- to manufacturers: e.g. soft drinks industry, confectionery industry, fermentation industry, other food and beverage industries

STARCH

- AGRANA produces starch and special starch products
- Starch is a complex carbohydrate which is insoluble in water. Starch is used in food processing e.g. as thickener and for technical purposes e.g. in the paper manufacturing process
- Bioethanol is part of our starch business

FRUIT

- Fruit juice concentrates customers are fruit juice and beverage bottlers and fillers
- Fruit preparations are special customized products for
 - the dairy industry,
 - the baked products industry,
 - the ice-cream industry.

STRATEGIC POSITIONING „B2B“

At the beginning there
is always agriculture...

AGRANA refines agrarian
raw materials...

AGRANA supplies
the Big Names...

confectionery, beverage,
fermentation industries, food
retailers; paper, textile,
pharmaceutical industries; feed
industry; dairy, ice-cream, bakery
industries and many more

We all consume
AGRANA every day
without noticing it...

STEADY DIVIDEND POLICY
AGRANA SHARE

Dividend yield: **4.5%¹**

P/E ratio: **14.1¹**

Market capitalisation: **€ 1,282.4² m**

¹ Based on 2014|15 YE results.

² Based on the closing share price as of 30 Dec. 2015.

AGRANA is committed to a **predictable, reliable and transparent dividend policy** designed for continuity. The distributions are based not only on profit but also on the Group's cash flow and debt situation and the need to maintain a sound balance sheet structure.

Performance (1 March 2015 – 13 January 2015): AGRANA +9.9% (last: 88.45), ATX -11.2% (last: 2,216.71)

DIVIDEND AND EARNINGS PER SHARE

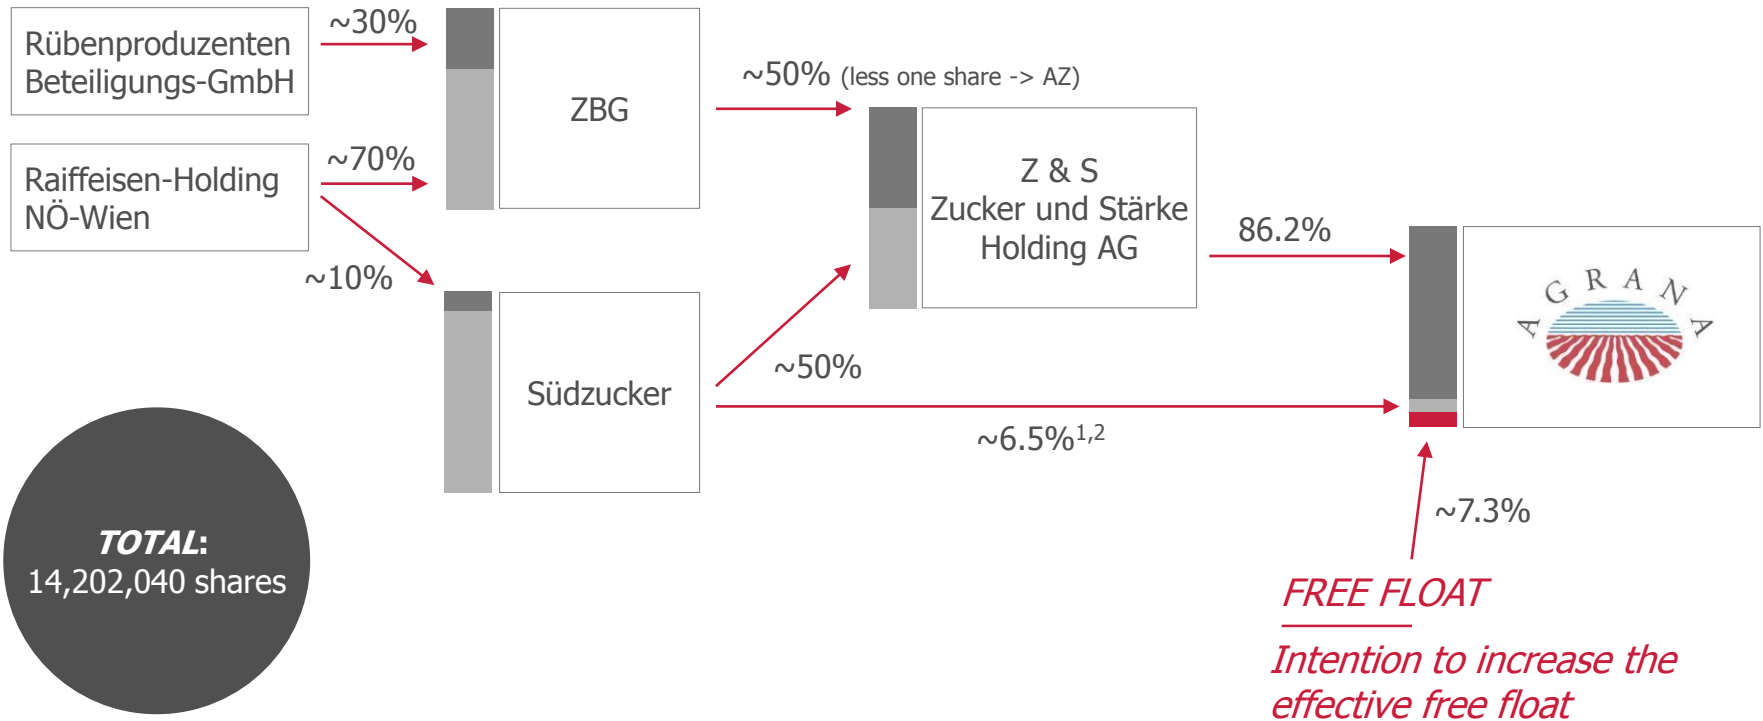

* The prior year data have been restated under IAS 8.

Dividend yield (based on the closing share price at the last balance sheet date): **4.47 %**

CLEAR COMMITMENT TO THE AGRANA GROUP'S CONTINUING LISTING ON THE STOCK MARKET

"TRANSITION" SHAREHOLDER STRUCTURE

¹ directly held by Südzucker; 4.9% to be placed in the market

² on any shares within this stake of 4.9% that are not placed, Z&S holds a call option which can be exercised since 1 March 2015

Q1-3 2015/16 OVERVIEW

- Release of an **ad-hoc announcement** on 19 November 2015: Due to higher forecast prices for bioethanol and an at least balanced result in the Sugar segment, the **EBIT forecast** for the full financial year 2015|16 **has again been raised**; AGRANA now forecasts a **slight increase in operating profit (EBIT)** in comparison to prior year
- In the **Sugar segment positive EBIT**, but reduction in operating profit due to **lower prices**
- The **Starch and Fruit segments are stabilising pillars** of the Group's operating profitability
- **Revenue**: € 1,908.0 m (prior year: € 1,914.4 m)
- **Operating profit (EBIT)**: € 108.8 m (prior year: € 124.4 m)
- **EBIT margin**: 5.7 % (prior year: 6.5 %)

INVESTMENT OVERVIEW

Q1-3 2015/16

SUGAR

- Expanded evaporator station in Leopoldsdorf, Austria, started operation at beginning of beet campaign
- Upgraded and enlarged molasses desugaring plant in Tulln, Austria, came on-stream in May 2015
- Full commissioning of packing lines at new packaging centre in Kaposvár, Hungary, in third quarter

STARCH

- Project to increase capacity and save energy implemented in Pischelsdorf, Austria, by commissioning of new heat exchanger
- Project for expanding infant formula production in Gmünd, Austria: Construction work in progress
- Plant expansion project in Aschach, Austria: Negotiations with authorities completed, detailed planning in progress, clearing of construction site begun

FRUIT

- Installation of additional IQF freezer tunnel in Mexico in second quarter
- Completion of expansion and upgrading of container cleaning plant at AGRANA Fruit in Australia in first quarter

FINANCIAL RESULTS FOR Q1-3 2015/16

SUGAR SEGMENT

REVENUE

€m

REVENUE slightly down to € 540.5 million

- Sugar sales prices especially with resellers (food wholesalers and retailers) and the sugar-using industry were down significantly
- Growth was achieved in the sales quantities of quota sugar, particularly with the food industry
- Sales volumes of non-quota sugar with the chemical industry were nearly at the year-earlier level, while exports to non-EU countries were off significantly
- Revenue from by-products decreased slightly for price reasons

EBIT

€m

EBIT positive, but declined significantly to € 10.4 million

- EBIT in the first nine months was driven by the significant decline in sugar selling prices compared to the prior year (in the first six months of 2014|15, higher prices were still being received from the 2013|14 campaign)
- EBIT improvement in the past three months was attributable primarily to the year-on-year drop in the cost of raw sugar and to the additional contribution margin from the higher sales volume

MARKET ENVIRONMENT IN Q1-3 2015/16

SUGAR SEGMENT

SUGAR

- For **2015 | 16 SMY** a decrease in world sugar production and further growth in consumption is forecasted; **reduction** of about 4 million tonnes **in global sugar stocks** by the end of the current SMY
- As a result of this volume forecast **downtrend in prices on world sugar markets was recently halted** and, after their summer lows, **prices regained stability** at the end of the reporting period
- Record yields in the **2014 | 15 European sugar beet campaign** resulted in full utilisation of the EU sugar quota and in a high volume of NQS
- However, **reduction in preferential import quantities** in SMY 2014|15 (decline in sugar prices) led to **significant reduction in quota sugar stocks**
- **Sugar production for the new SMY 2015 | 16** will not only fall compared with last year's record output but is also expected to be less than the EU average of the last five years
- Reasons for this projection are that **planting area was reduced** in important production countries and that the **long dry period** in Central and Eastern Europe had a negative effect on sugar beet yields
- However, **full quota utilisation and sufficient quantities of non-quota sugar** are assured by the fact that some surplus sugar was carried over from the old (2014|15) to the new (2015|16) SMY to absorb last year's large crop

WORLD SUGAR PRODUCTION & CONSUMPTION

Million tonnes

Source: F.O. Licht (27 October 2015)

* Expectation

** Production: October-September

SEPTEMBER 2017 - END OF QUOTAS

- CEE area will continue to be a “sugar deficit region” (AGRANA is located in these main deficit areas)
 - Complexity in logistics and costs from Western Europe are somehow a protection of intra-EU imports
 - The company operates its own raw sugar refineries; safeguarding of existing market share in CEE
- “3-legs-strategy” with beet, refining and trading; focus on balanced strategy between these three fields of activity
- AGRANA has established long-term relationships with key sugar producers in the LDCs and ACPs (duty-free-imports)
- Uncertain market development requires continuous flexibility
- High volatility expected

SEGMENT

STARCH

VERSATILE

STARCH SEGMENT

MARKET POSITION

- Austrian production sites:
 - **potato** starch factory in Gmünd
 - **corn** starch plant in Aschach
 - **wheat** starch plant in Pischelsdorf
- Operational management and coordination of international holdings in Hungary and Romania
- The bioethanol business also forms part of the Starch segment
- Focus on **highly refined speciality products**
- **Innovative, customer-driven products** supported by application advice
- **Leading position in organic and in GMO-free** starches for the food industry

*5 STARCH PLANTS
INCL. 2 BIOETHANOL FACILITIES*

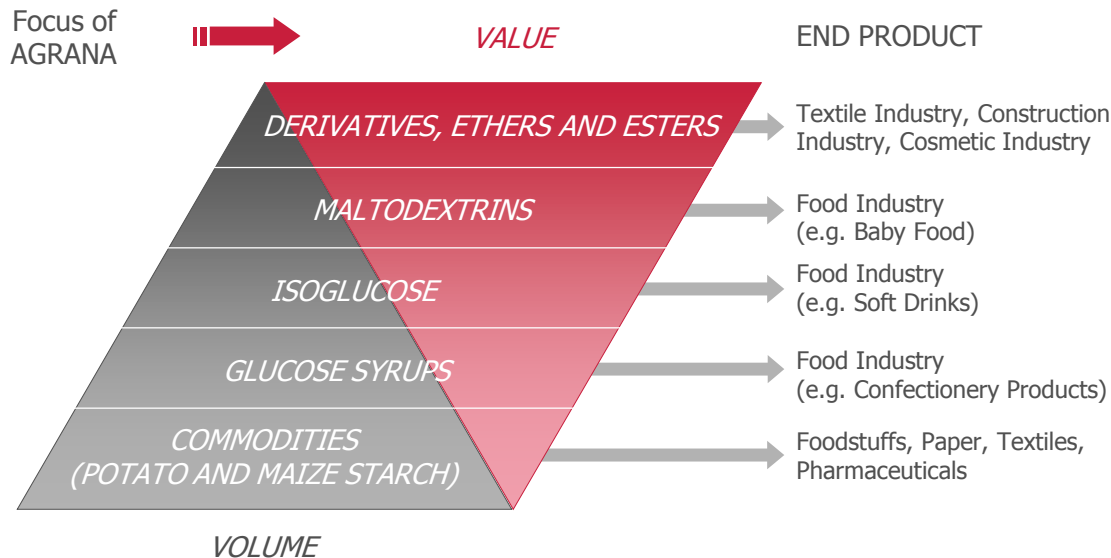

- Countries with production sites
- ▨ Main markets

STARCH SEGMENT

SPECIALISATION STRATEGY

FOOD

- Growth in products from special raw materials (market leadership)
- Growth in starch derivatives for fruit preparations
- Growth in „high care“-starches

NON-FOOD

- Innovation and market leadership in
 - Special applications for construction industry
 - Adhesive (sack adhesive)
- Growth in cosmetics industry
- Growth in special applications for paper, textile & cardboard industry

FINANCIAL RESULTS FOR Q1-3 2015|16

STARCH SEGMENT

REVENUE

€m

REVENUE at € 544.0 m slightly above prior year level

- Growth was achieved, among other areas, in the bioethanol business, which benefited from higher selling prices, and in (starch) wet derivatives thanks to higher sales volumes
- Decreased revenue from saccharification products reflects the persistent low prices in the European sugar market
- By-products generated slightly less revenue than in prior-year, as a result of lower raw material prices

EBIT

€m

EBIT significantly up to € 52.9 million

- Growth was driven above all by the improved sales prices of ethanol
- At the same time, average raw material costs for the Starch segment as a whole also eased slightly year-on-year
- The earnings decrease at HUNGRANA, the equity-accounted subsidiary, reflects the lower selling prices for saccharification products

MARKET ENVIRONMENT IN Q1-3 2015/16

STARCH SEGMENT

STARCH

- Size of the **market for food starch** was **steady** in terms of sales quantities; **poor potato harvest** led to rising market prices for potato starch
- In **Starch saccharification products** in general and **isoglucose** in particular, there is **high competitive pressure** in the run-up to October 2017 and the associated liberalisation of the sugar market
- **Paper and corrugated board sector** was marked by higher-than-expected demand in the EU
- **Bioethanol business** continues to benefit from an even balance of supply and demand in the EU and from a strong US dollar -> led to **upward movements in prices** – and hence in earnings – for European ethanol producers
- In **protein by-products** there was sustained strong demand for high-protein offerings and for vital wheat gluten

WORLD CEREAL PRODUCTION & CONSUMPTION

Million tonnes

Critical stocks limit at 20 % of consumption

Source: IGC
e...estimate f...forecast
Period: July - June

ISOGLUCOSE MARKET IN THE EU

Isoglucose Quota of the EU-28 ~< 5% of sugar consumption

AGRANA holds 125,000 tonnes (->> HUNGRANA: 250,000 tonnes)

Starting with 1st of October 2017 also the quotas for isoglucose will be abolished, which means new **growth potential** for AGRANA.

10 - 15% market share of isoglucose expected.

MARKET OPPORTUNITIES FOR ISOGLUCOSE

- Main application area for isoglucose is the "SOFT DRINKS" market
- Substitution potential on the European market of 10 - 15% of granulated sugar
- The main argument for the use of isoglucose in place of granulated sugar is the current price advantage of approximately 10 %

AGRANA BIOETHANOL ACTIVITIES

PISCHELSDORF (Austria)

- Total investment: € 125 million
- Capacity: up to 240,000m³ (= 190,000 tonnes)
- Production start: June 2008
- Raw material base: wheat, corn and sugar beet thick juice
- By-products: up to 190,000 tonnes of ActiProt© (animal feed)

HUNGRANA (Hungary)

- Investment volume: ~ € 100 m (50% share held by AGRANA: ~ € 50 m)
 - for grind increase from 1,500 to 3,000 tonnes/day
 - for isoglucose capacity increase due to quota increase
 - for bioethanol expansion
- Capacity: up to 187,000 m³
- Conclusion of expansion programme: July 2008
- Raw material base: corn

1 JANUARY 2008 – 11 JANUARY 2016 (EUR)

DEVELOPMENT OF ETHANOL PRICES

SEGMENT

FRUIT

QUALITY-DRIVEN

FRUIT SEGMENT - BUSINESS MODEL

FRUIT PREPARATIONS

- Based on mostly frozen fruits
- Tailor-made customer products (several thousand recipes worldwide)
- Customers: dairy, bakery and ice cream industry
- Shelf life of the fruit preparation ~6 weeks -> necessity to produce regionally

FRUIT JUICE CONCENTRATES

- Based on fresh fruits
- Production in the growing area of the fruits (water content and quality of the fruits don't allow far transports)
- Customers: bottling industry
- Shelf life of fruit juice concentrates ~2 years -> can be shipped around the world

FRUIT SEGMENT

MARKET POSITION

FRUIT PREPARATIONS

- World Market Leader in Fruit preparations global market share > 30%
- While the market's sales volumes of fruit preparations in Europe are stagnating at a high absolute level, the non-European regions are overall showing good market growth rates

FRUIT JUICE CONCENTRATES

- Largest producer of fruit juice concentrates in Europe (AUSTRIA JUICE)
- In general, optimisation measures taken in previous years show their positive effects
- Customer portfolio extended and new markets

*25 FRUIT PREPARATION PLANTS &
14 FRUIT JUICE CONCENTRATE PLANTS*

- Countries with production sites
- Potential growth regions

FRUIT SEGMENT

REVENUE

€m

REVENUE stable at € 823.5 million

- In fruit preparations, revenue expanded by almost 9%, reflecting sales volume that rose slightly from one year earlier, and higher sales prices amplified by favourable currency effects (mostly from the USD, CNY, KRW and ARS)
- In the fruit juice concentrates business, on the other hand, revenue declined by a little more than 20% as a result mainly of sharply lower selling prices from the 2014 crop for apple juice concentrate

EBIT

€m

EBIT with € 45.5 million less than in the prior year

- While **fruit preparations** division showed a **significant improvement in EBIT**, the lower apple prices of the 2014 campaign and the associated considerable decline in concentrate prices had a **negative impact on margins** in the **fruit juice concentrate** activities
- In fruit preparations, the business trend was significantly positive, particularly in Europe, North and Latin America, as well as in Russia, South Korea and China, while currencies that strengthened against the euro (most notably the US dollar) also contributed to the gain in EBIT

FRUIT

Fruit preparations

- Ongoing **mild decrease** in demand **in the EU**
- Continued **slight growth** in the **non-European markets**
- The rate of **world market growth** in retail sales volumes of drinkable and fruit yoghurts in the 2015 calendar year was an average of about 4%

Fruit juice concentrates

- **Prices for apple juice concentrate in Europe rose significantly** during 2015 campaign -> stable demand coupled with a shortage of supply in comparison to the 2014 crop
- However, **apple prices too are up significantly** from last year
- As a consequence of the **political situation in Ukraine**, two-thirds of the concentrate produced there was forwarded to Europe, while one-third was sold in Ukraine

2015/16
OUTLOOK

AGRANA GROUP

OUTLOOK FOR 2015/16

- Outlook for 2015|16 was again adjusted with the ad-hoc release as of 19 November 2015
- AGRANA now forecasts a **slight increase** in operating profit (EBIT) for its 2015|16 FY in comparison to the prior year (2014|15: € 121.7 million)

AGRANA Group

Revenue 2015/16 →

EBIT 2015/16 ↗

- In view of a combination of **increased price expectations for bioethanol**, **lower raw material prices** and an **at least neutral earnings result in the Sugar segment**, the EBIT forecast has again been raised
- With regards to Group **revenues**, AGRANA continues to expect a **stable development** (2014|15: € 2,493.5 million)
- In 2015|16 the AGRANA Group's **total investment** of about **€ 112 million** for the financial year will be ahead of depreciation (€ ~90 million)

2015/16 VS 2014/15

REVENUE AND EARNINGS DEVELOPMENT

AGRANA SEGMENTS

OUTLOOK FOR 2015/16

SUGAR

Revenue ↓↓
EBIT ↓↓
but positive

- AGRANA expects a price-induced **decrease in revenue** as a result of the market environment
- A **reduction in raw material costs** and a **cost-saving programme** that was already begun in the 2014|15 FY for all countries **will partly offset the decline in average selling prices**
- **EBIT** in 2015|16 for the Sugar segment can thus be expected **to be at or slightly above the break-even level**

STARCH

Revenue ↗
EBIT ↑↑

- AGRANA is forecasting **revenue** for 2015|16 **to grow slightly** from the prior year
- The considerable **increase in ethanol prices** (compared to prior year) and an **expanded specialties business** are more than **making up** for the margin **losses in saccharification products**
- With ethanol quotations remaining stable on the current high level, AGRANA expects **EBIT** in the Starch segment **to rise significantly**

FRUIT

Revenue ↑
EBIT ↓

- AGRANA expects that in the 2015|16 financial year the Fruit segment will achieve **moderate revenue growth** and what is now assumed to be **a slight decrease in EBIT**
- The **fruit preparations** division, with rising sales volumes, continues to project a significant increase in revenue and EBIT
- The **fruit juice concentrate** division will be significantly below prior year and detract from Fruit segment EBIT until the end of the financial year for reasons of lower prices, seasonal postponements of product draw-down by customers, and exchange rate effects
