MARKET STRUCTURE SINCE OCTOBER 2017

Border protection: unchanged

Import duty of € 419 per tonne (white sugar) and € 339 per tonne (raw sugar) from non-preferential countries
Preferential agreements with LDC-/ACP- and other countries

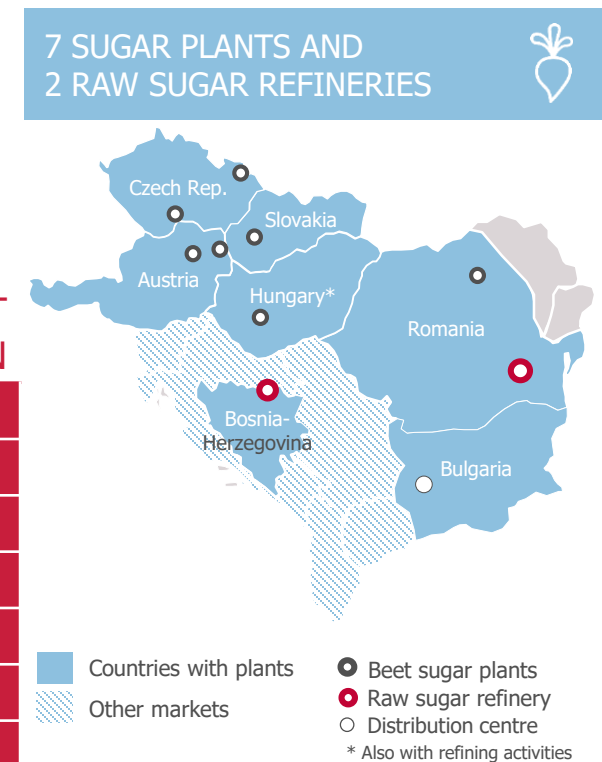

BENEFIT FROM THE STRONG MARKET POSITION IN CEE AND SEE

AGRANA SUGAR AFTER THE END OF QUOTAS

- CEE area will continue to be a “sugar deficit region” (AGRANA is located in these main deficit areas)
 - Complexity in logistics and costs from Western Europe are somehow a protection of intra-EU imports
 - Defend and extend existing market share in CEE
- AGRANA has established **long-term relationships** with key sugar producers in the LDCs and ACPs (duty-free-imports)
- Uncertain market development requires **continuous flexibility**
- High volatility** expected

SUGAR SEGMENT

REVENUE

€m

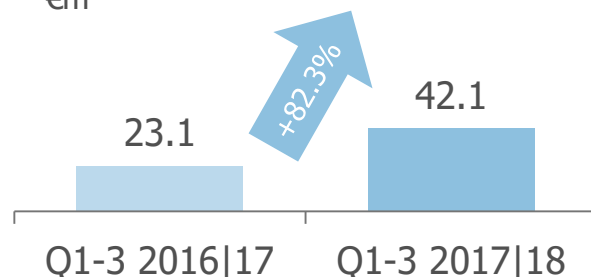

REVENUE slightly up at € 550.6 million

- Sugar segment's revenue was 3.4% up compared to the year-ago period
- Positive effects came from an increase in sugar sales prices relative to the first nine months of the prior year, and by slightly higher sales quantities

EBIT

€m

EBIT increased significantly to € 42.1 million

- EBIT rose still benefiting in the first six months from an improved sales price environment compared to the year-earlier period
- In the financial 3rd quarter – the first to fall into the new 2017|18 SMY – the earnings measure operating profit declined by 16.5%
- Exceptional items (€ 3.6 m) included expenses for reorganisation measures

SUGAR SEGMENT

■ World sugar market

- After two deficit years a **production surplus** is forecasted for SMY 2017|18
- **Sugar quotations** at commodity exchanges follow a **bearish trend** mainly **driven by a surplus in the world sugar balance** linked to positive harvest outlooks in major beet and cane production regions such as the EU, India and other Asian countries

■ EU sugar market

- SMY 2017|18: **+16% increase** in the sugar beet **planting area**, ~77 tonnes of beet per hectare -> sugar production **significantly above five year's average** expected
- European Commission is forecasting EU sugar production at about 21 million tonnes for SMY 2017|18

■ EU policy

- Since 1 October 2017, the European sugar industry is operating in a **new environment**
- **End of the production quotas** for sugar and isoglucose and **abolition** of the **minimum beet prices**

STARCH

STARCH SEGMENT

MARKET POSITION

- Austrian production sites:
 - **Potato** starch factory in Gmünd
 - **Corn** starch plant in Aschach
 - **Wheat** starch & bioethanol plant in Pischelsdorf
- Operational management and coordination of international holdings in Hungary and Romania
- The bioethanol business also forms part of the Starch segment
- Focus on **highly refined speciality products**
- **Innovative, customer-driven products** supported by application advice
- **Leading position in organic and in GMO-free** starches for the food industry

STARCH

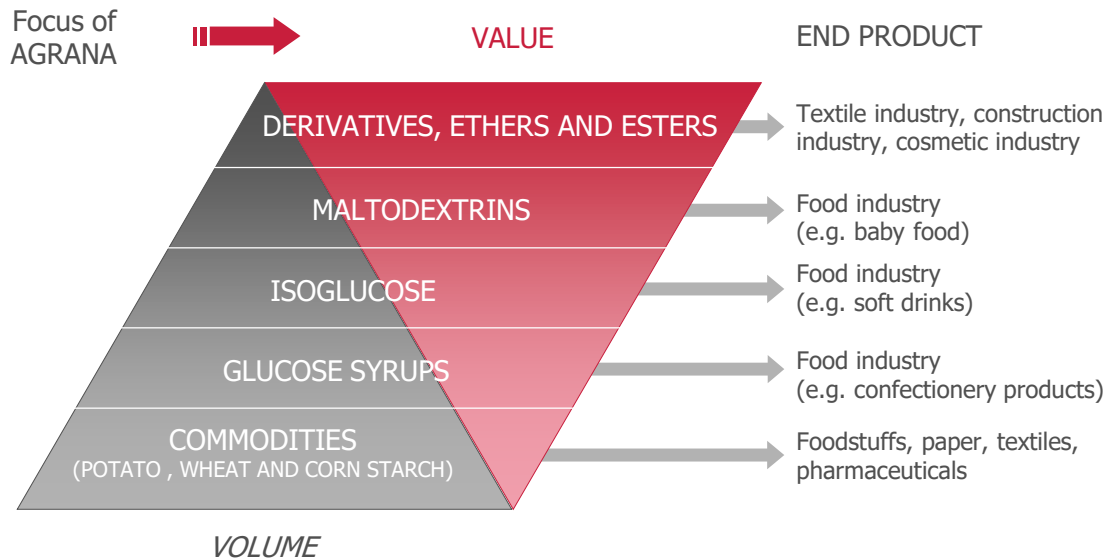

5 starch plants
(incl. 2 bioethanol plants)

STARCH SEGMENT

SPECIALISATION STRATEGY

FOOD

- Growth in products from special raw materials (market leadership)
- Growth in starch derivatives for fruit preparations
- Growth in „high care“-starches

NON-FOOD

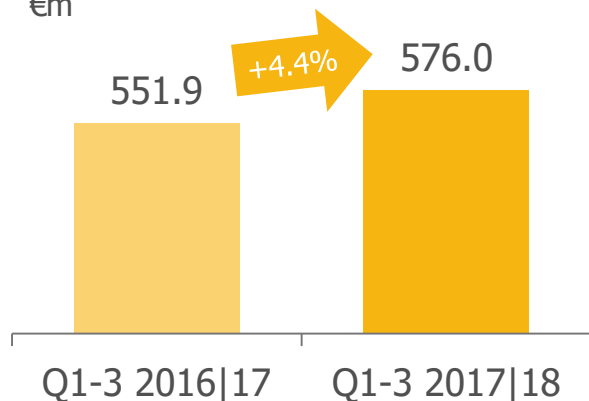

- Innovation and market leadership in
 - Special applications for construction industry
 - Adhesive (sack adhesive)
- Growth in cosmetics industry
- Growth in special applications for paper, textile & cardboard industry

STARCH SEGMENT

REVENUE

€m

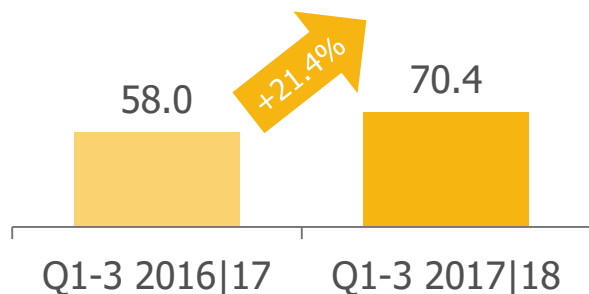

REVENUE at € 576.0 m slightly above prior year

- Growth of 4.4% compared to the previous year period
- Key positive drivers were higher sales volumes of starches and saccharification products and higher bioethanol prices than in the prior-year nine-month comparative period

EBIT

€m

EBIT significantly up to € 70.4 million

- Besides the higher bioethanol quotations, other drivers of the earnings growth were productivity gains, favourable raw material prices and lower energy prices
- Significant EBIT reduction in the third quarter yoy was the result of higher raw material costs (from the 2017 campaign); further factor was, that in October 2017 the new capacity added in Aschach, Austria, was commissioned

STARCH SEGMENT

- **Food starch** segment was steady in terms of sales quantities; prices for native and modified starch products moved upward
- Principal upside driver in **non-food starches** was the demand from the paper and corrugated board industry -> steady growth of the online mail order market, which stimulates consumption of corrugated board and container board
- Concerning **starch saccharification products** in general and **isoglucose** in particular, there is high competitive pressure due to the liberalisation of the sugar market since October 2017
- **Bioethanol business** remains volatile; in the first half of 2017|18, closer correspondence between supply and demand in the EU -> stabilisation in prices; since the last quarter of the 2017 calendar year, quotations are visibly trending lower again -> downside market pressure in the European ethanol market
- **By-products** prices on a firm level with high-protein products and vital wheat gluten in particular

2017|18 FY

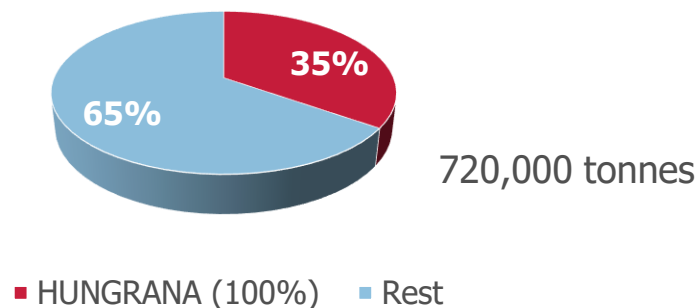

ISOGLUCOSE MARKET IN THE EU

As of 1st of October 2017 also the quotas for isoglucose were abolished, which means new **growth potential** for AGRANA.

Before, AGRANA held 125,000 tonnes (->> HUNGRANA: 250,000 tonnes).

Former isoglucose quota of the EU-28 $\sim < 5\%$ of sugar consumption

Higher market share of isoglucose expected.

FRUIT SEGMENT

REVENUE

€m

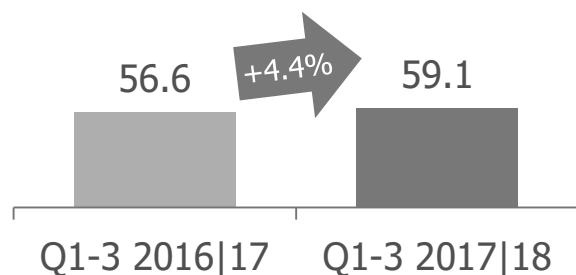

REVENUE stable at € 884.0 million

- Fruit preparations: small increase in sales volumes and somewhat higher selling prices added up to slight revenue growth
- Fruit juice concentrates: revenue decreased as a result of lower raw material prices and a reduction in concentrate prices for product from the 2016 crop compared to 2015

EBIT

€m

EBIT slightly higher than in prior year

- While the fruit preparations activities generated significant earnings growth, EBIT in the fruit juice concentrate business was down in the third quarter as a result of a reduced operating performance -> idle-capacity costs amid lower availability of apples

FRUIT SEGMENT

Fruit preparations

- Global market for spoonable fruit yoghurts is expected to grow at about 1% in the 2017 calendar year⁽¹⁾
 - Major markets such as Europe and North America are saturated
 - Expanding markets in the Middle East & Africa (growth of 5.1%) and Asia (growth of 4.7%)⁽¹⁾
 - Drinkable yoghurts continue to show a worldwide growth trend of 5.3%⁽¹⁾
- Global market for ice-cream continues to grow by about 2% p.a. until 2020⁽¹⁾
- Stable growth is also expected in the bakery sector

Fruit juice concentrates

- European prices for apple juice concentrate stabilised at a solid level in the first half of 2017|18 as a result of higher demand and limited quantities in supply out of the main growing regions
- Low crop volumes in the major apple production regions Poland, Hungary, Germany and Italy caused prices of concentrate from the now-completed 2017 apple campaign to rise significantly from the prior year
- Marketing of berry juice concentrates from the 2017 crop is largely complete

AGRANA SEGMENTS

OUTLOOK FOR 2017|18

SUGAR

Revenue ↘
EBIT ↑↑

- **Sugar segment:** in anticipation of stable sales volumes, AGRANA is projecting revenue slightly below that of the prior year
- Despite a continued challenging market environment in the 4th quarter of the current FY -> **significant increase** in **EBIT** in 2017|18 compared to the year before due to improved margins generated in H1 2017|18 and cost savings

STARCH

Revenue ↗
EBIT ↑

- **Starch segment:** slightly rising sales volumes and **slight growth** in **revenue**
- Despite last year's record high -> **moderate increase** in **EBIT**
 - For ethanol, the average sales prices for the year are expected to surpass those of the prior year
 - Ethanol earnings improvement, combined with a constant margin forecast for the rest of the product portfolio

FRUIT

Revenue ↗
EBIT ↑

- **Fruit segment:** slight **growth** in **revenue** and a **moderate improvement** in **EBIT**
 - Fruit preparations: positive revenue trend driven by rising sales volumes; helped by expected earnings contribution of the new company in Argentina, EBIT in the fruit preparations activities is expected to increase significantly
 - Fruit juice concentrates: revenue is expected to increase slightly; costs of idle apple juice concentrate capacity resulting from the significantly smaller apple harvest in Europe -> EBIT is projected to be significantly lower than one year earlier
