

NATURALLY BRONZE with AGENAFLO OS 9051

“developed & formulated exclusively by Azelis UK Life Sciences Ltd.”

A simple balm incorporating a pearlescent pigment.

INSIDE THE FORMULATION:

VEGELINE 65

A 100% vegetable alternative to petrolatum with similar texturing effects but improved properties for cosmetic use. It has a moisture retaining effect, preventing the TEWL (trans epidermal water loss), soft during use, it has sensorial properties and smooth after-feel like vegetable butters. It has a water resistant function offered by the original blend of castor oil and carnauba wax. It is a thickening agent for the oily phase of the formulation, it gives structure, consistency and viscosity to finished products. It is both non irritating and non comedogenic. VEGELINE® 65: drop melting point 62°C – 72°C.

AGENAFLO OS 9051

This is a non-GMO aluminium octenylsuccinic modified starch for use as a softening/texturing agent.

COLORONA COPPER SPARKLE

Large particle size, metallic effect pearlescent pigment for incorporation into all types of colour cosmetics. Can also be incorporated into toothpastes and a wide range of skincare, haircare and toiletry products to give a high lustre, glittery eye-catching look.

Ingredients	INCI-Name	%w/w	Supplier
-------------	-----------	------	----------

Phase A

Ingredients	INCI-Name	%w/w	Supplier
VEGELINE 65	Ricinus Communis Seed Oil, Hydrogenated Castor Oil, Copernicia Cerifera Cera	70,00	Sophim / Azelis

Phase B

AGENAFLO OS 9051	Aluminum Starch Octenylsuccinate	10,00	AGRANA / Azelis
CRLORONA COPPER SPARKLE	Mica, C.I. 77491	20,00	Merck / Azelis

PROCEDURE

1. Heat phase A to 70°C.
2. Add phase B to phase A mixing until homogenous.
