#### EU SUGAR MARKET MARKET STRUCTURE SINCE OCTOBER 2017

Import duty of € 419 per tonne (white sugar) and € 339 per tonne (raw sugar) from non-preferential countries Preferential agreements with LDC-/ACP- and other countries

# BENEFIT FROM THE STRONG MARKET POSITION IN CEE AND SEE

- CEE area will continue to be a "sugar deficit region" (AGRANA is located in these main deficit areas)
  - Complexity in logistics and costs from Western Europe are somehow a protection of intra-EU imports
  - Defend and extend existing market share in CEE
- AGRANA has established long-term relationships with key sugar producers in the LDCs and ACPs (duty-freeimports)
- Uncertain market development requires continuous flexibility

# FINANCIAL RESULTS FOR Q1-3 2017|18

#### **REVENUE slightly up at € 550.6 million**

- Sugar segment's revenue was 3.4% up compared to the year-ago period
- Positive effects came from an increase in sugar sales prices relative to the first nine months of the prior year, and by slightly higher sales quantities

#### **EBIT** increased significantly to € 42.1 million

- EBIT rose still benefiting <u>in the first six months</u> from an improved sales price environment compared to the year-earlier period
- In the <u>financial 3rd quarter</u> the first to fall into the new 2017|18 SMY – the earnings measure operating profit <u>declined</u> by 16.5%
- Exceptional items (€ 3.6 m) included expenses for reorganisation measures

MARKET ENVIRONMENT IN Q1-3 2017|18

#### World sugar market

- After two deficit years a **production surplus** is forecasted for SMY 2017|18
- Sugar quotations at commodity exchanges follow a bearish trend mainly driven by a surplus in the world sugar balance linked to positive harvest outlooks in major beet and cane production regions such as the EU, India and other Asian countries

#### EU sugar market

- SMY 2017|18: +16% increase in the sugar beet planting area, ~77 tonnes of beet per hectare -> sugar production significantly above five year's average expected
- European Commission is forecasting EU sugar production at about 21 million tonnes for SMY 2017|18

#### EU policy

- Since 1 October 2017, the European sugar industry is operating in a new environment
- End of the production quotas for sugar and isoglucose and abolition of the minimum beet prices

# STARCH

# To most, it is three segments.

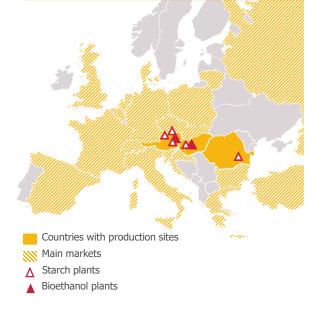

# MARKET POSITION

- Austrian production sites:
  - Potato starch factory in Gmünd
  - Corn starch plant in Aschach
  - Wheat starch & bioethanol plant in Pischelsdorf

- Growth in starch derivatives for fruit preparations
- Growth in "high care"-starches

#### NON-FOOD

- Innovation and market leadership in
  - Special applications for construction industry
  - Adhesive (sack adhesive)
- Growth in cosmetics industry
- Growth in special applications for paper, textile & cardboard industry

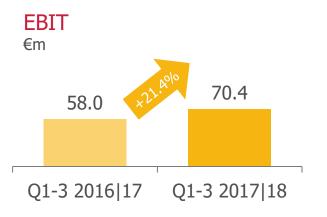

#### FINANCIAL RESULTS FOR Q1-3 2017|18 STARCH SEGMENT

REVENUE €m 551.9 576.0 576.0 201-3 2016|17 Q1-3 2017|18

#### **REVENUE** at € 576.0 m slightly above prior year

- Growth of 4.4% compared to the previous year period
- Key positive drivers were higher sales volumes of starches and saccharification products and higher bioethanol prices than in the prior-year nine-month comparative period

#### EBIT significantly up to € 70.4 million

- Besides the higher bioethanol quotations, other drivers of the earnings growth were productivity gains, favourable raw material prices and lower energy prices
- Significant EBIT <u>reduction in the third quarter</u> yoy was the result of higher raw material costs (from the 2017 campaign); further factor was, that in October 2017 the new capacity added in Aschach, Austria, was commissioned

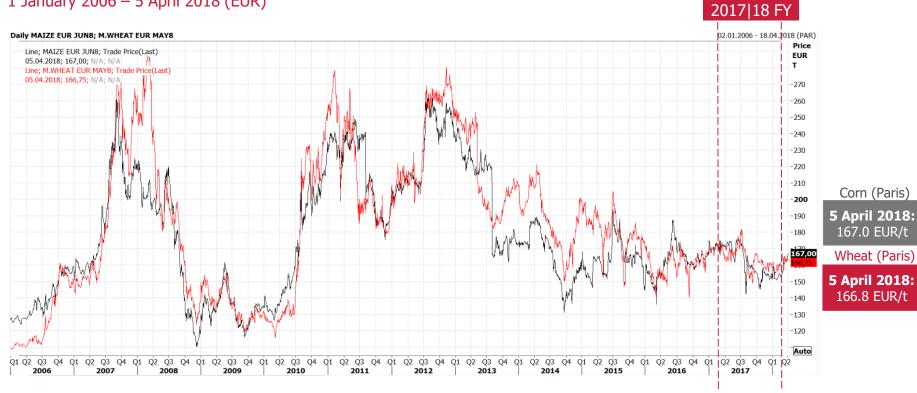

- Food starch segment was steady in terms of sales quantities; prices for native and modified starch products moved upward
- Principal upside driver in **non-food starches** was the demand from the paper and corrugated board industry -> steady growth of the online mail order market, which stimulates consumption of corrugated board and container board
- Concerning starch saccharification products in general and isoglucose in particular, there is high competitive pressure due to the liberalisation of the sugar market since October 2017
- Bioethanol business remains volatile; in the first half of 2017|18, closer correspondence between supply and demand in the EU -> stabilisation in prices; since the last quarter of the 2017 calendar year, quotations are visibly trending lower again -> downside market pressure in the European ethanol market
- By-products prices on a firm level with high-protein products and vital wheat gluten in particular

#### WHEAT & CORN (EURONEXT, PARIS) **COMMODITY PRICES**

#### 1 January 2006 – 5 April 2018 (EUR)

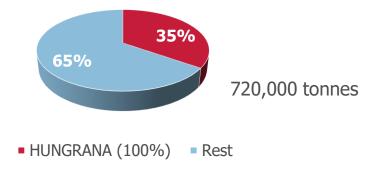

As of 1<sup>st</sup> of October 2017 also the quotas for isoglucose were abolished, which means new growth potential for AGRANA.

**Before**, AGRANA held 125,000 tonnes (->> HUNGRANA: 250,000 tonnes).

Former isoglucose quota of the EU-28 ~< 5% of sugar consumption

Higher market share of isoglucose expected.

#### AGRANA BIOETHANOL ACTIVITIES

- Production start: June 2008
- Raw material base: wheat, corn and sugar beet thick juice
- By-products: up to 190,000 tonnes of ActiProt© (animal feed)

#### HUNGRANA (Hungary)

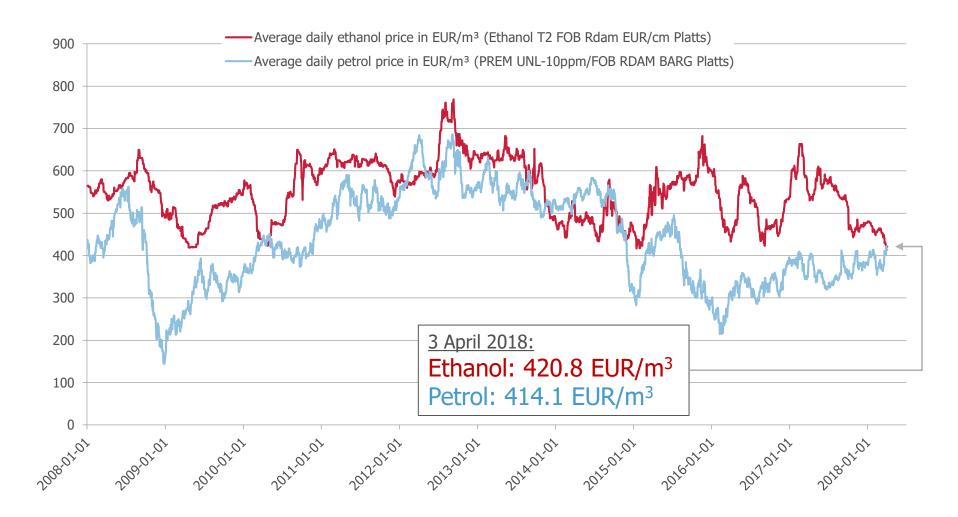

- Investment volume: ~ € 100 m (50% share held by AGRANA: ~ € 50 m)
  - for grind increase from 1,500 to 3,000 tonnes/day
  - for isoglucose capacity increase due to quota increase
  - for bioethanol expansion
- Capacity: up to 187,000 m<sup>3</sup>
- Conclusion of expansion programme: July 2008
- Raw material base: corn

#### 1 JANUARY 2008 – 3 APRIL 2018 (EUR) DEVELOPMENT OF ETHANOL PRICES

#### 28 FRUIT PREPARATION PLANTS & 14 FRUIT JUICE CONCENTRATE PLANTS

Countries with production sitesPotential growth regions

FINANCIAL RESULTS FOR Q1-3 2017|18 FRUIT SEGMENT

# REVENUE €m 883.1 +0.1% 884.0 Q1-3 2016|17 Q1-3 2017|18

#### **REVENUE stable at € 884.0 million**

- Fruit preparations: small increase in sales volumes and somewhat higher selling prices added up to slight revenue growth
- Fruit juice concentrates: revenue decreased as a result of lower raw material prices and a reduction in concentrate prices for product from the 2016 crop compared to 2015

EBIT €m

#### **EBIT slightly higher than in prior year**

 While the fruit preparations activities generated significant earnings growth, EBIT in the fruit juice concentrate business was down in the third quarter as a result of a reduced operating performance -> idlecapacity costs amid lower availability of apples

#### MARKET ENVIRONMENT IN Q1-3 2017|18 FRUIT SEGMENT

#### **Fruit preparations**

- Global market for spoonable fruit yoghurts is expected to grow at about 1% in the 2017 calendar year<sup>(1)</sup>
  - Major markets such as Europe and North America are saturated
  - Expanding markets in the Middle East & Africa (growth of 5.1%) and Asia (growth of 4.7%)<sup>(1)</sup>
  - Drinkable yoghurts continue to show a worldwide growth trend of 5.3%<sup>(1)</sup>
- Global market for ice-cream continues to grow by about 2% p.a. until 2020<sup>(1)</sup>
- Stable growth is also expected in the bakery sector

#### Fruit juice concentrates

- European prices for apple juice concentrate stabilised at a solid level in the first half of 2017|18 as a result of higher demand and limited quantities in supply out of the main growing regions
- Low crop volumes in the major apple production regions Poland, Hungary, Germany and Italy caused prices of concentrate from the now-completed 2017 apple campaign to rise significantly from the prior year
- Marketing of berry juice concentrates from the 2017 crop is largely complete

# AGRANA SEGMENTS

SUGA	<b>२</b>
Revenue	2
EBIT	$\mathbf{T}$

- Sugar segment: in anticipation of stable sales volumes, AGRANA is projecting revenue slightly below that of the prior year
- Despite a continued challenging market environment in the 4th quarter of the current FY -> significant increase in EBIT in 2017|18 compared to the year before due to improved margins generated in H1 2017|18 and cost savings

STARCI	н
Revenue	7
EBIT	♠

- Starch segment: slightly rising sales volumes and slight growth in revenue
- Despite last year's record high -> moderate increase in EBIT
  - For ethanol, the average sales prices for the year are expected to surpass those of the prior year
  - Ethanol earnings improvement, combined with a constant margin forecast for the rest of the product portfolio

- Fruit segment: slight growth in revenue and a moderate improvement in EBIT
  - Fruit preparations: positive revenue trend driven by rising sales volumes; helped by expected earnings contribution of the new company in Argentina, EBIT in the fruit preparations activities is expected to increase significantly
  - Fruit juice concentrates: revenue is expected to increase slightly; costs of idle apple juice concentrate capacity resulting from the significantly smaller apple harvest in Europe -> EBIT is projected to be significantly lower than one year earlier
