We all consume AGRANA every day without noticing it...

AGRANA PRODUCTS IN DAILY LIFE

<image>

- Fruit juice concentrates customers are fruit juice and beverage bottlers and fillers
- Fruit preparations are special customized products for
 - the dairy industry,
 - the baked products industry,
 - the ice-cream industry.

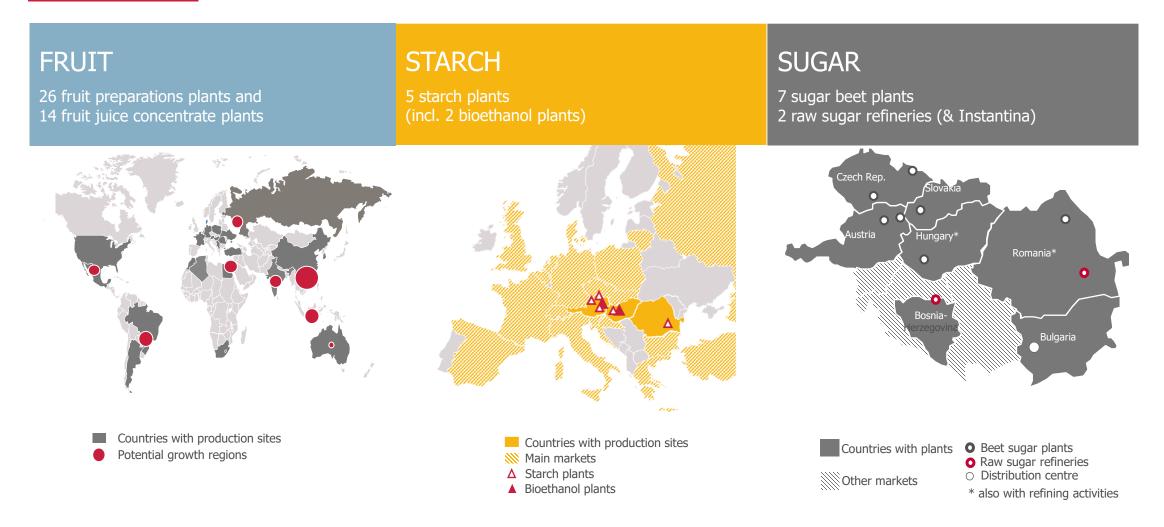

- AGRANA produces starch and special starch products
- Starch is a complex carbohydrate which is insoluble in water. Starch is used in food processing e.g. as thickener and for technical purposes e.g. in the paper manufacturing process
- Bioethanol is part of our starch business

Sugar is sold to

- consumers via the food trade and
- manufacturers: e.g. soft drinks industry, confectionery industry, fermentation industry, other food and beverage industries

STARCH

- Fruit preparations (dairy and non-dairy)
- Fruit juice concentrates
- Other juice core products (value-added business, incl. compounds & flavours, NFC, fruit wine)
- Frozen fruit and fruit reselling

- Native and modified starches
- Saccharification products
- Alcohol and ethanol

- Other core products (dairy and instant products, long-life potato products, etc.)
- By-products (protein products, DDGS, gluten, etc.)
- Others (soy, dried beet pulp, etc.)

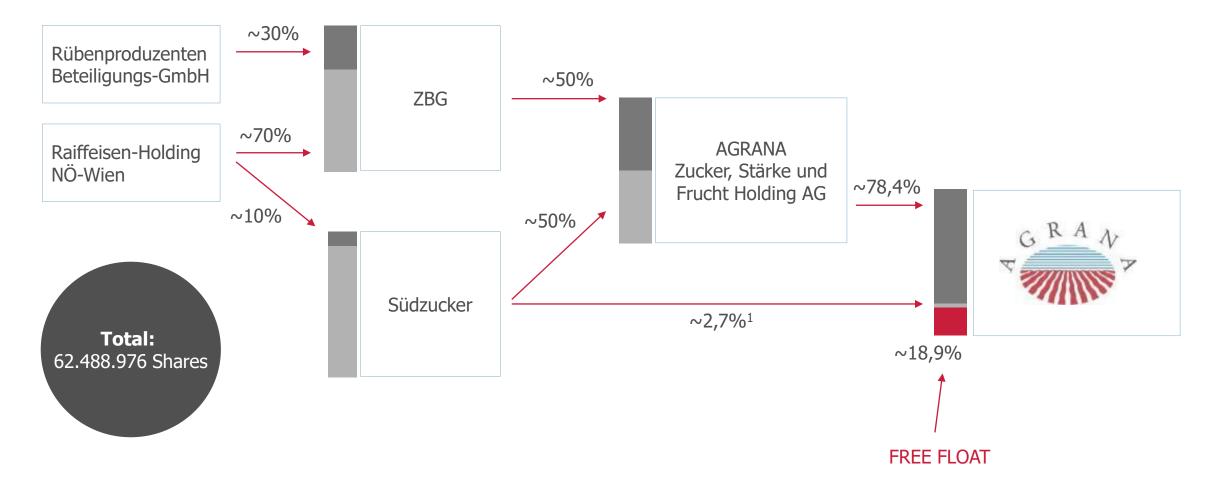

- Sugar: Resellers
- Sugar: Industrial customers

CURRENT STATUS

SHAREHOLDER STRUCTURE

¹ directly held by Südzucker

- Amid a sustained volatile business environment, operating performance improved in almost all our major businesses
- Difficult business trend in Asia, which gave rise to an asset impairment charge of about € 16 million at the end of the financial third quarter
- Changes on the Management Board, adjusted responsibilities
- Outlook for the full year 2023 | 24: we still expect the Group's EBIT to be very significantly higher than for the 2022 | 23 financial year
 - This positive guidance reflects the robust operating performance in the first three quarters of the financial year.
 - From the fourth quarter of 2023|24 and in the subsequent months, we see an increasingly challenging business environment.

SUSTAINABLE VALUE GROWTH

CLEAR PLANS FOR IMPLEMENTING THE CLIMATE STRATEGY

Scope 1+2 emissions

- Ongoing energy efficiency measures, comprehensive green energy package
- From 2025 on, use of low-protein raw material residues for energy instead of natural gas
- Investments: by 2030 approx. € 180 million
 by 2040 a total of about € 470 million

Scope 3 emissions

- Ensuring freedom from deforestation for imported raw materials and commodities
- Promotion of the use of lower-emission fertilisers in contract farming
- Promotion of the implementation of regenerative, low-emission agricultural practices

AGRANA CLIMATE STRATEGY

NEAR-		SCOPE	1	SCOPE 2			SCOPE 3	
TERM 2030		2030 (from 2019 20 base year)						
		50% abs. reduction of GHG emissions			approx. 34% abs. reduction (incl. future FLAG Guidance)			
	l		So	cience based ta	argets	validate	ed in September 2023	
-ONG-TERM TARGET- not yet submitted				ero emissions y 2040		0	Net-zero emissions by 2050 at the latest	

SCOPE 1+2 FOCUS AREAS @AGRANA

Long-term commitment by 2040 (not SBTi validated)

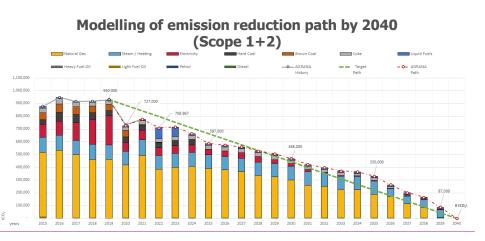

• Switch to 100% renewable energy (scope 1+2) and net-zero emissions

Near-term target by 2030 | 31 (SBTi validated) on track

- 50 % of emissions from 2019|20 base year of 928.000 t CO₂ through the following measures:
 - Energy efficiency measures in all divisions
 - Fade-out of coal use at the last coal-powered sugar production site in Opava|CZ by 2025|26
 - Electrification of processes and switch to green electricity
 - Energetic use of low-protein residuals in line with regulatory provisions

Photovoltaic installation | Austria Juice Kröllendorf

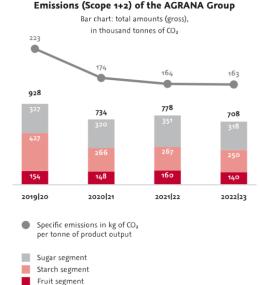

AGRANA CLIMATE STRATEGY

• September 2023: Verification of science-based climate targets (SBTs) by 2030 compared to 2019|20.

- 50% emission reduction (scope 1+2)
- 30% emission reduction (scope 3); approx. 34% incl. FLAG
- Further ambition: net-zero emissions scope 1+2 by 2040, scope 3 by 2050 at the latest.
- Top 5 emission reduction projects by 2030

Segment	Site	Description	~t CO ₂ reduction	Energy saving (in MWh)	Investment (in € million)	Implementation
Sugar	Opava	Switching from hard coal to natural gas (or, in the longer term, potentially biogas)	25,400	25,470	4.7	2025
Starch	Gmünd	Biomass Boilers Part 1	23,000	114,000	25	2028

Starch	Aschach	Heat recovery	23,000	115,000	24	2026

- Investments for scope 1+2 by 2030: € 203 million for the AGRANA Group (of which € 93,5 million in AT); by 2040, based on project modelling, AGRANA Group would have to invest at least € 506 million (of which € 202 million in AT) in order to achieve the target.
- Concrete scope 3 measures under development, based on AGRANA's specific emission factors for processed raw materials
 - Hotspots Scope 3: ensuring deforestation free supply chains for imported raw materials & traded goods, use of lower-emission fertilizers, support of the implementation of regenerative agricultural practices (i.e. CO₂ sequestration and biodiversity promotion)

23,000 t additional consumption of HEL for potential natural gas substitution and securing energy supply in AT. Natural gas substitution and securing energy supply in AT compensated by lower raw material processing volumes

SEGMENT OVERVIEW

segment FRUIT

FRUIT SEGMENT BUSINESS MODEL

FRUIT PREPARATIONS

- Based on mostly frozen fruits
- Tailor-made customer products (several thousand recipes worldwide)
- Customers: dairy, bakery and ice cream industry
- Shelf life of the fruit preparation ~6 weeks -> necessity to produce regionally

FRUIT JUICE CONCENTRATES

- Based on fresh fruits
- Production in the growing area of the fruits (water content and quality of the fruits don't allow far transports)
- Customers: bottling industry
- Shelf life of fruit juice concentrates ~2 years -> can be shipped around the world

FRUIT PREPARATION – WHAT IS IT ABOUT?

FRUIT SEGMENT

... most important ingredient of fruit preparations

- Frozen (IQF or block)
- Aseptic
- Purees
- Concentrates

... sweetens and supports taste and durability

- Crystal sugar
- Liquid sugar (syrup)
- Other sweeteners
- Thickeners create a good mouth-feel and prevent emulsions
 - Pectins
 - Starch
 - Guar, Xanthan, ...

optional flavors and colours for an even fruitier taste and an intense colour

FRUIT SEGMENT MARKET POSITION

FRUIT PREPARATIONS

- World Market Leader in Fruit preparations global market share > 35%
- The emerging markets are overall showing good market growth rates, while the market's sales volumes of fruit preparations in Europe and the US are stagnating at a high absolute level

FRUIT JUICE CONCENTRATES

- Largest producer of fruit juice concentrates in Europe (AUSTRIA JUICE)
- In general, optimisation measures taken in previous years show their positive effects
- Customer portfolio extended and new markets

26 FRUIT PREPARATION PLANTS & (14 FRUIT JUICE CONCENTRATE PLANTS (

Q1-3 2023|24 MARKET ENVIRONMENT - HIGHLIGHTS

Fruit segment

- <u>Fruit preparations</u>: business is back on track since the beginning of the financial year; stress factor here is the continuing **difficult business trend in Asia**
- Fruit juice concentrate: situation in the fruit juice concentrate business remains very satisfactory; improved contribution margins of apple juice concentrates made from the 2022 crop

Q1-3 2023|24

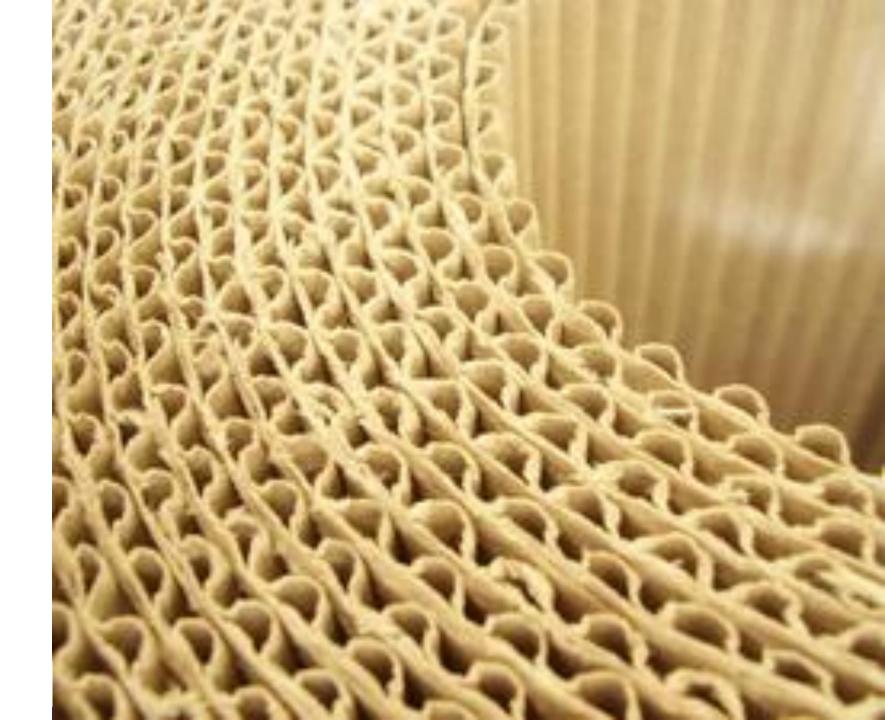

RAW MATERIALS AND PRODUCTION - HIGHLIGHTS

Fruit segment

- For strawberries, main fruit in the fruit preparations business, global demand volume was fully contracted in the Mediterranean growing regions; average purchase prices were moderately below the previous year's level (sufficient availability of raw materials)
- Juice concentrates: for the main crop apple, availability of raw materials in the 2023 campaign was above the previous year's level, but slightly below an average campaign

segment STARCH

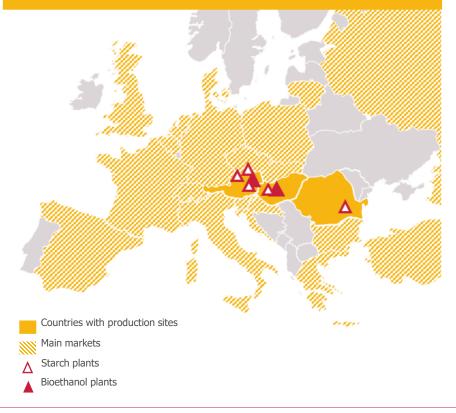

- Austrian production sites:
 - Potato starch factory in Gmünd
 - Corn starch plant in Aschach
 - Wheat starch & bioethanol plant in Pischelsdorf
- Operational management and coordination of international holdings in Hungary and Romania
- The bioethanol business also forms part of the Starch segment
- Focus on highly refined speciality products
- Innovative, customer-driven products supported by application advice
- Leading position in organic and in GMOfree starches for the food industry

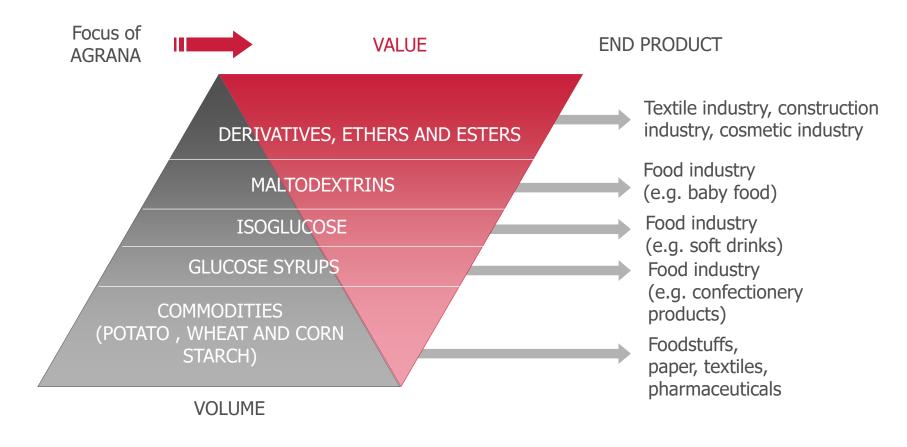

STARCH

5 starch plants (incl. 2 bioethanol plants)

SPECIALISATION STRATEGY

FOOD

- Growth in products from special raw materials (market leadership)
- Growth in starch derivatives
 for fruit preparations
- Growth in "high care"starches

NON-FOOD

- Growth in (special applications for) paper, textile & cardboard industry
- Innovation and market leadership in
 - Special applications for construction industry
 - Adhesive (sack adhesive)
- Growth in cosmetics industry

AGRANA BIOETHANOL ACTIVITIES

PISCHELSDORF (Austria)

- Total investment: € 125 million
- Capacity: up to 240,000 m³ (= 190,000 tonnes)
- Production start: June 2008
- Raw material base: wheat, corn and sugar beet thick juice*
- Raw material base: wheat, corn, B+C starch slurry

HUNGRANA (Hungary)

- Investment volume: ~ € 100 m (50% share held by AGRANA: ~ € 50 m)
 - for grind increase from 1,500 to 3,000 tonnes/day
 - for isoglucose capacity increase due to quota increase
 - for bioethanol expansion
- Capacity: up to 187,000 m³
- Conclusion of expansion programme: July 2008
- Raw material base: corn

AVAILABLE IN AUSTRIA SINCE THE END OF MARCH 2023

- AGRANA has been producing enough bioethanol for a 10% blend (E10) in Austria since 2008
- Before E10 introduction, 40% of production used for E5 blending; 60% exported, resulting in a loss of nearly 200,000 t GHG savings for Austria

Austria 16th EU country with E10

BIO-ETHANOL REDUCES PROTEIN GAP

- Bioethanol is produced exclusively from the starch content of feed grains; the valuable protein content remains in "concentrated" form in the feed cycle and replaces soy imports
- thus the market demand for conc. protein due to dietary habits is eliminated
- approx. 200,000 tons of non-GMO protein feed ActiProt® significantly reduces EU protein feed imports

Q1-3 2023|24 MARKET ENVIRONMENT - HIGHLIGHTS

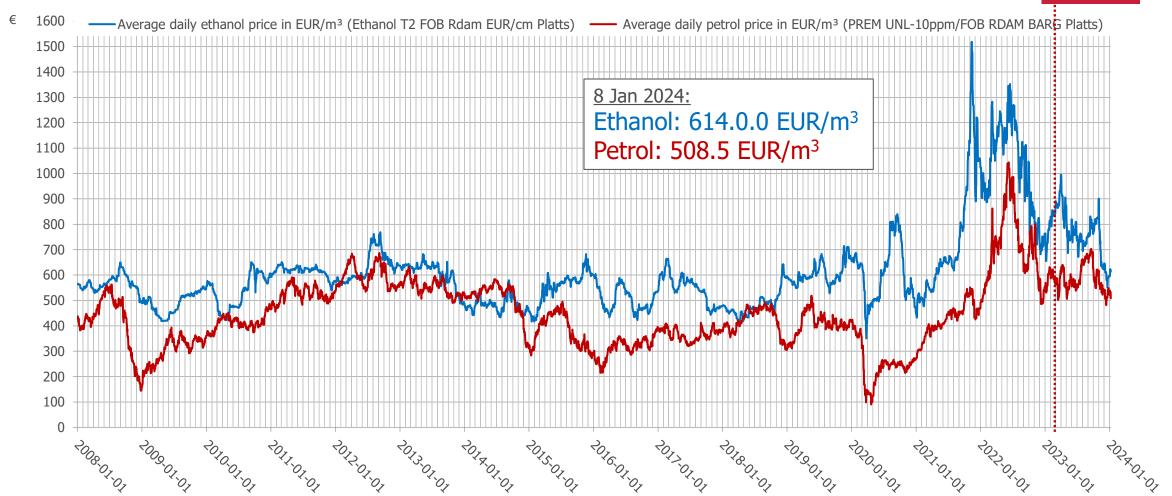

Starch segment

- Overall margin for starch products was successfully held stable thus far, despite the economy-driven challenges
- However, due to the significant fall in Platts prices, the performance in the ethanol operations was much weaker than in the same period of the year before, when ethanol earnings were above average

RAW MATERIALS AND PRODUCTION - HIGHLIGHTS

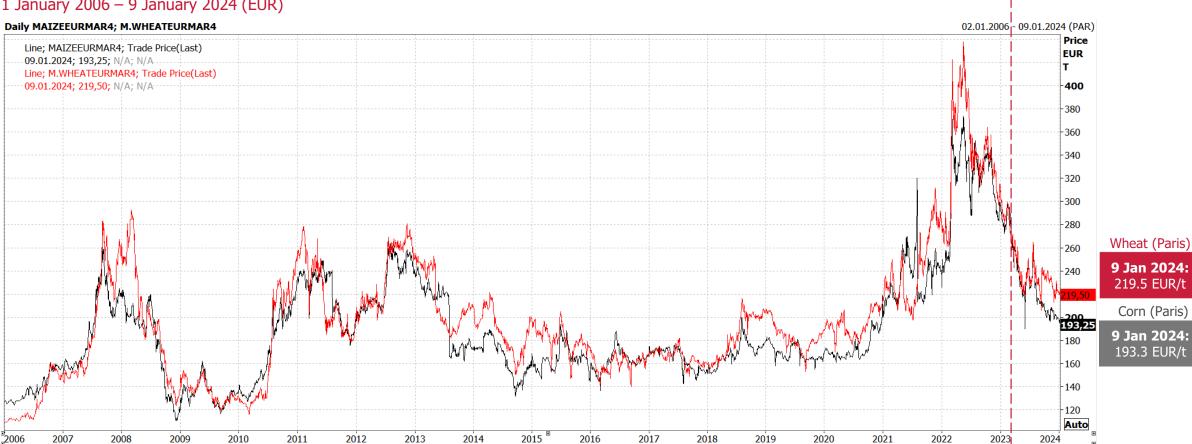

Starch segment

- Raw material prices: **decreasing trend** on the spot markets
- A mainly utilisation-related, significantly poorer showing of the HUNGRANA Group led to an overall decline in Starch segment EBIT for the first three quarters of 2023|24

segment SUGAR

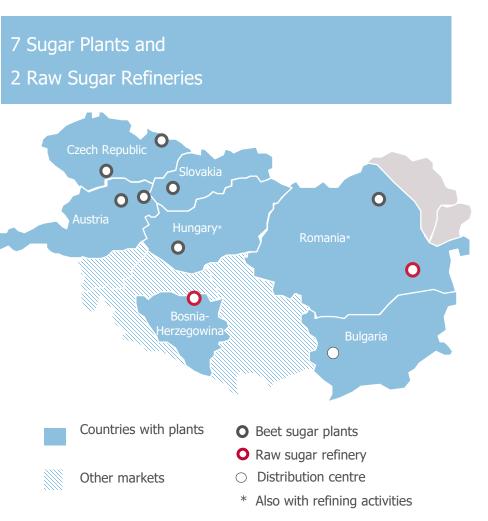

BENEFIT FROM THE STRONG MARKET POSITION IN CEE AND SEE AGRANA SUGAR SINCE THE END OF QUOTAS

#1

- CEE area will continue to be a "sugar deficit region" (AGRANA is located in these main deficit areas)
 - Complexity in logistics and costs from Western Europe are somehow a protection of intra-EU imports
 - Defend and extend existing market share in CEE
 - AGRANA has established long-term relationships with key sugar producers in the LDCs and ACPs (duty-free-imports)
 - MARKET Uncertain market development requires POSITION continuous flexibility Austria #1 High volatility #1 Hungary Czech Republic #2 Slovakia #1 #1 Romania Bosnia and Herzegovina #1

Bulgaria

Q1-3 2023|24 MARKET ENVIRONMENT - HIGHLIGHTS

Sugar segment

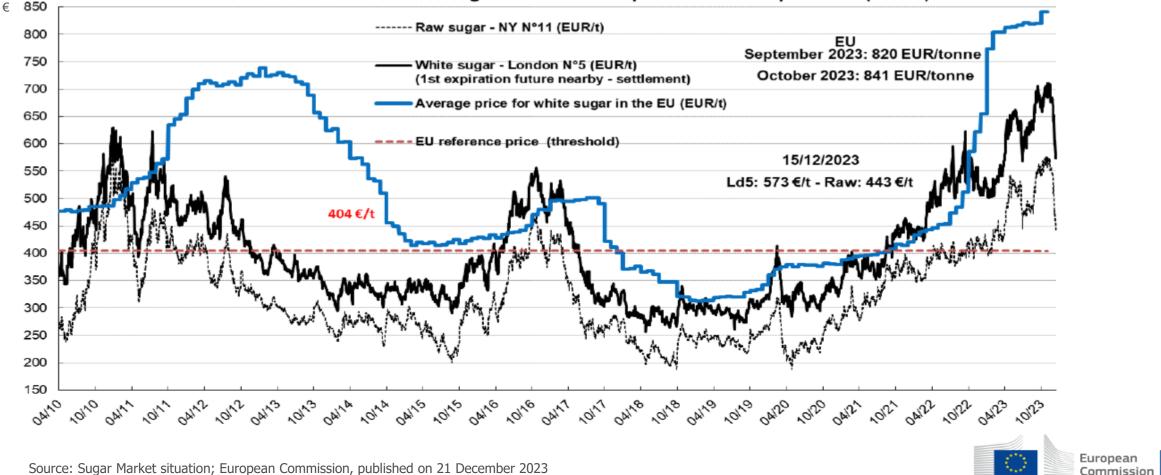

- **Duty-free sugar imports from Ukraine** will remain a challenge for AGRANA, at least in the short term
- Upward price trend continued to strengthen after the new customer contracts took effect at the start of the 2023|24 sugar marketing year (1 October 2023)

Q1-3 2023|24

RAW MATERIALS AND PRODUCTION - HIGHLIGHTS

Sugar segment

- Beet processing in the 2023 campaign has been good to date, with significantly better capacity utilisation and higher sugar production volumes expected
- Negotiations for beet production acreage in 2024 are still in progress; AGRANA is confident that further increase in planting area can be achieved

AGRANA GROUP

WAR IN UKRAINE

AGRANA GROUP

- AGRANA in Ukraine since 1997 / 778 employees*
- Two sites in Vinnitsa (300 km SW of Kiev) for production of fruit preparations and fruit juice concentrates
- Agricultural production plant in Luka
- Product sales largely in Ukraine

Current situation

- Current situation on site relatively calm; no hostilities in the vicinity of the plant
- Limited production to supply regional customers
- Power supply ensured by backup diesel generators
- Around 30 MA on army deployment

*Average number of full-time equivalents employed during FY 2023|24

AGRANA GROUP

- AGRANA's presence in Russia is exclusively in the Fruit segment
- Production of fruit preparations in Serpuchov, about 100 km south of Moscow
- 292 employees*
- Sales of products in Russia and other CIS countries
- Task as supplier of essential staple foods and obligation as employer continues to be fulfilled -> therefore, no withdrawal planned at present
- AGRANA backs politically imposed sanctions against Russia
- In addition, **investment freeze** decided
- Monitoring of further developments and ongoing reassessment of involvement in Russia

Q1-3 2023|24 VS PRIOR YEAR REVENUE BY SEGMENT

FRUIT

- Fruit preparations revenue rose for price reasons
- In the fruit juice concentrate activities, revenue remained stable, with lower delivery volumes offset by higher selling prices

STARCH

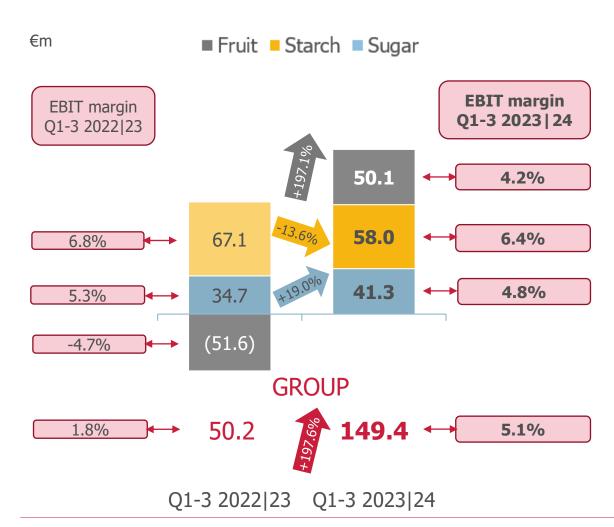

- Sales were moderately lower than in the same period of the previous year, in which the war in Ukraine led to massive price increases on the markets
- Selling prices for ethanol fell significantly, owing to a steep year-on-year drop of about 27% in Platts quotations

SUGAR

 Growth, achieved despite lower sales volumes, was driven by a substantial rise in sugar selling prices

Q1-3 2023|24 VS PRIOR YEAR EBIT BY SEGMENT

FRUIT

- As of 30 November 2023, within EBIT, a non-cash impairment loss of about € 16 million was recognised on assets in Asia
- In the prior-year comparative period, following an impairment test at 31 August 2022, impairment on assets and goodwill was recognised in exceptional items as part of EBIT, due primarily to increased cost of capital
- Operating performance yoy was better in the fruit preparations business as well as in the fruit juice concentrate business

STARCH

- A key reason was that AGRANA's share of the earnings result of the equity-accounted HUNGRANA group deteriorated very significantly
- It was primarily in the first half of 2023|24 that the low margins of the ethanol due to significantly lower Platts prices weighed on the Starch segment's operating profitability

SUGAR

 Improvement due to significantly increased margins despite a marked rise in beet prices

AGRANA GROUP OUTLOOK FOR 2023 24

The positive EBIT guidance reflects the robust operating performance in the first three quarters of the financial year.
 From the fourth quarter of 2023 | 24 and in the subsequent months, AGRANA sees an increasingly challenging business environment.

Forecast uncertainty and assumptions

The war in Ukraine, which has been underway since the beginning of the 2022|23 financial year, broadly led to an increase in the already high volatility in the sales markets and fueled price hikes in procurement markets, notably for raw materials and energy. In addition, the fact that agricultural imports from Ukraine are granted duty-free access could cause further market disruption in the EU. For the full 2023|24 financial year and also for 2024|25, despite the current reduction in volatility it remains difficult to assess the economic and financial impact, the security of supply and the duration of this temporary exceptional situation.
