PROCEDURE

1. Heat up A and B to 80°C separately.
2. Slowly add A to B under stirring.
3. Homogenize for a short moment and stir strongly.
4. At 45 °C homogenize for 3 minutes again.
5. Add C below 45°C under continue stirring and stir cold.

The recommendations and formulations given are based on our knowledge and experience in the field of technical application. They are, to the best of our belief, correct, but are offered without obligation. Those who use our recommendations and formulations as well as those who process CLR Active Agents are themselves responsible for the adherence to prevailing statutory regulations and the observance of patent rights as well as other protective rights for other companies.
