INTRODUCTION & BUSINESS OVERVIEW

QUICK FACTS UPDATE

AGRANA

- We refine agricultural raw materials, turning them into a range of different industrial products to supply local producers as well as large multinational companies active in the food processing industry, in particular.
- We also serve the end-consumer market in the Sugar segment with country-specific brands such as “Wiener Zucker” in Austria.

AGRANA PRODUCTS IN DAILY LIFE AT A GLANCE

SUGAR

Sugar is sold

- to consumers via the food trade and
- to manufacturers: e.g. soft drinks industry, confectionery industry, fermentation industry, other food and beverage industries

STARCH

- AGRANA produces starch and special starch products
- Starch is a complex carbohydrate which is insoluble in water. Starch is used in food processing e.g. as thickener and for technical purposes e.g. in the paper manufacturing process
- Bioethanol is part of our starch business

FRUIT

- Fruit juice concentrates customers are fruit juice and beverage bottlers and fillers
- Fruit preparations are special customized products for
 - the dairy industry,
 - the baked products industry,
 - the ice-cream industry.

H1 2015/16 OVERVIEW

- Release of an **ad-hoc announcement** on 22 September 2015: in view of the Group's solid first-half EBIT and the improved margin forecast in the ethanol business, AGRANA **upgraded its guidance for EBIT in the 2015|16 financial year** from "significantly" to "moderately" below the prior year
- As expected **lower prices in the Sugar segment** led to significant reduction in EBIT
- The **Starch and Fruit segments are stabilising pillars** of the Group's operating profitability
- **Revenue**: € 1,263.5 m (H1 prior year: € 1,285.2 m)
- **Operating profit (EBIT)**: € 68.7 m (H1 prior year: € 87.0 m)

FINANCIAL RESULTS FOR H1 2015/16

SUGAR SEGMENT

REVENUE

€m

REVENUE down to € 345.0 million

- Significant drop in sales prices with customers in industry and wholesalers/retailers compared to prior year
- Considerable increase of quantities sold to the food industry
- Volumes of out-of-quota sugar sold into the chemical industry were in line with the previous year's level
- Exports to non-EU countries were lower than in the previous year's period
- Revenue from by-products declined slightly

EBIT

€m

EBIT declined significantly to € 6.4 million

- Decline was caused by reduced sugar sales prices compared to the first six months of the prior year, when higher prices were still being received from 2013|14 contracts
- Lower raw material costs (particularly for raw sugar) did not offset the revenue reduction

MARKET ENVIRONMENT IN H1 2015/16

SUGAR SEGMENT

SUGAR

- The **downward trend on world sugar markets** witnessed since June 2014 took the white and raw sugar quotations to **lows not seen since 2009**
- In its fourth, revised estimate from July 2015 of the **world sugar balance** for the 2014|15 SMY, the analytics firm F.O. Licht continues to forecast **steady to slightly rising world sugar production and further growth in consumption**
- **Record-high yields** in the **2014 | 15** European sugar beet campaign resulted in the full utilisation of the EU sugar quota and in the production of 6.4 million tonnes of NQS; as a consequence of drastically fallen sugar prices in the EU, **preferential import volumes** in SMY 2014|15 remained well below the prior year; **quota sugar stocks** at the end of SMY 2014|15 were therefore **down significantly**
- **SMY 2015 | 16:** a significant **cut in production** volume is currently predicted; area planted to sugar beet in important production countries has been markedly reduced; moreover, **weather conditions (drought)** in Central and Eastern Europe led to significantly lower yield expectations
- Nevertheless, a full utilisation of the quota and a sufficient non-quota supply are expected due to **carry-overs of non-quota stocks** from the last SMY; at the same time we expect a **further decrease in quota sugar stocks**

** Production: October-September

SEPTEMBER 2017 - END OF QUOTAS

- CEE area will continue to be a “sugar deficit region” (AGRANA is located in these main deficit areas)
 - Complexity in logistics and costs from Western Europe are somehow a protection of intra-EU imports
 - The company operates its own raw sugar refineries; safeguarding of existing market share in CEE
- “3-legs-strategy” with beet, refining and trading; focus on balanced strategy between these three fields of activity
- AGRANA has established long-term relationships with key sugar producers in the LDCs and ACPs (duty-free-imports)
- Uncertain market development requires continuous flexibility
- High volatility expected

SEGMENT

STARCH

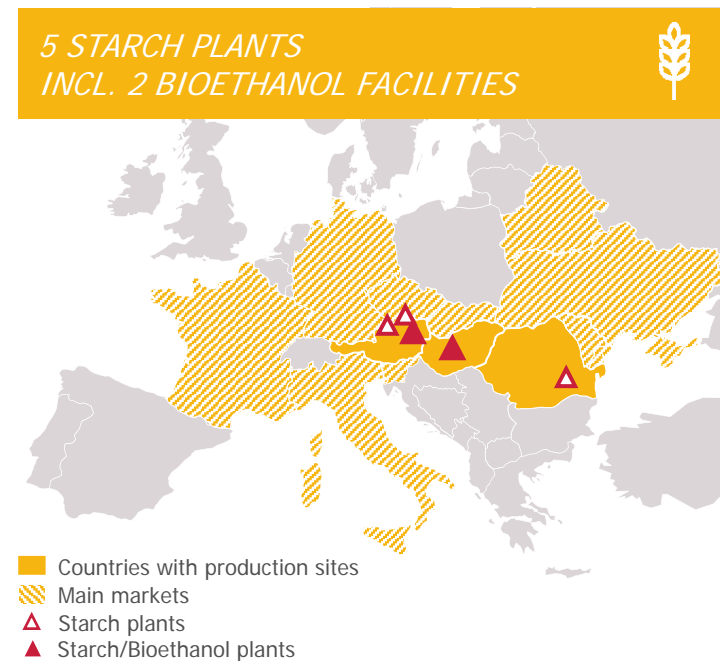

VERSATILE

STARCH SEGMENT

MARKET POSITION

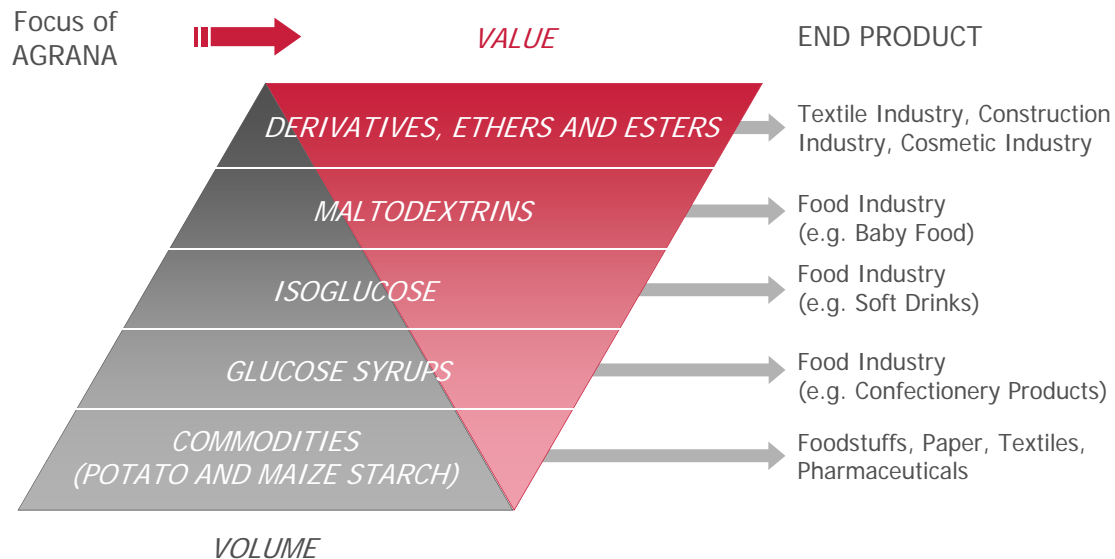

- Austrian production sites:
 - **potato** starch factory in Gmünd
 - **corn** starch plant in Aschach
 - **wheat** starch plant in Pischelsdorf
- Operational management and coordination of international holdings in Hungary and Romania
- The bioethanol business also forms part of the Starch segment
- Focus on **highly refined speciality products**
- **Innovative, customer-driven products** supported by application advice
- **Leading position in organic and in GMO-free** starches for the food industry

STARCH SEGMENT

SPECIALISATION STRATEGY

FOOD

- Growth in products from special raw materials (market leadership)
- Growth in starch derivatives for fruit preparations
- Growth in „high care“-starches

NON-FOOD

- Innovation and market leadership in
 - Special applications for construction industry
 - Adhesive (sack adhesive)
- Growth in cosmetics industry
- Growth in special applications for paper, textile & cardboard industry

FINANCIAL RESULTS FOR H1 2015|16

STARCH SEGMENT

REVENUE

€m

REVENUE at € 352.7 m slightly above prior year level

- Revenue growth in the ethanol business due to higher prices for bioethanol
- Declining revenues from saccharification products reflect the low level of the European sugar prices
- Revenue from by-products was (price-driven) slightly below the previous year's figure

EBIT

€m

EBIT significantly up to € 31.1 million

- Increase in earnings is primarily due to improved margins for ethanol
- At the same time, raw material costs have fallen slightly on average compared to last year
- The result of the equity-accounted subsidiary HUNGRANA was lower than in the prior year (reflecting the decline in selling prices for saccharification products)

MARKET ENVIRONMENT IN H1 2015/16

STARCH SEGMENT

STARCH

- Size of the **market for food starch** is **steady** in terms of sales quantities; low crop outlook for starch potatoes (especially in southern Germany, Austria and Eastern Europe) is causing a moderate rise in market prices
- **Starch saccharification products** in general and **isoglucose** in particular are showing direct impacts of the pressure in sugar markets
- The **paper and corrugated board sector** is marked by higher-than-expected demand in the EU
- For **bioethanol** the market setting in the EU picked up again, after passing through a difficult stage at the beginning of the calendar year; Ethanol prices in Europe were not negatively influenced from farther afield, rising to € 583 per m³ FOB Rotterdam at the end of August
- Continuing **high demand** for **wheat gluten** and **protein products**

ISOGLUCOSE MARKET IN THE EU

Isoglucose Quota of the EU-28 ~ < 5% of sugar consumption

AGRANA holds 125,000 tonnes (->> HUNGRANA: 250,000 tonnes)

Starting with 1st of October 2017 also the quotas for isoglucose will be abolished, which means new **growth potential** for AGRANA.

10 - 15% market share of isoglucose expected.

MARKET OPPORTUNITIES FOR ISOGLUCOSE

- Main application area for isoglucose is the "SOFT DRINKS" market
- Substitution potential on the European market of 10 - 15% of granulated sugar
- The main argument for the use of isoglucose in place of granulated sugar is the current price advantage of approximately 10 %

AGRANA BIOETHANOL ACTIVITIES

PISCHELSDORF (Austria)

- Total investment: € 125 million
- Capacity: up to 240,000m³ (= 190,000 tonnes)
- Production start: June 2008
- Raw material base: wheat, corn and sugar beet thick juice
- By-products: up to 190,000 tonnes of ActiProt© (animal feed)

HUNGRANA (Hungary)

- Investment volume: ~ € 100 m (50% share held by AGRANA: ~ € 50 m)
 - for grind increase from 1,500 to 3,000 tonnes/day
 - for isoglucose capacity increase due to quota increase
 - for bioethanol expansion
- Capacity: up to 187,000 m³
- Conclusion of expansion programme: July 2008
- Raw material base: corn

FRUIT SEGMENT - BUSINESS MODEL

FRUIT PREPARATIONS

- Based on mostly frozen fruits
- Tailor-made customer products (several thousand recipes worldwide)
- Customers: dairy, bakery and ice cream industry
- Shelf life of the fruit preparation ~6 weeks -> necessity to produce regionally

FRUIT JUICE CONCENTRATES

- Based on fresh fruits
- Production in the growing area of the fruits (water content and quality of the fruits don't allow far transports)
- Customers: bottling industry
- Shelf life of fruit juice concentrates ~2 years -> can be shipped around the world

FRUIT SEGMENT

MARKET POSITION

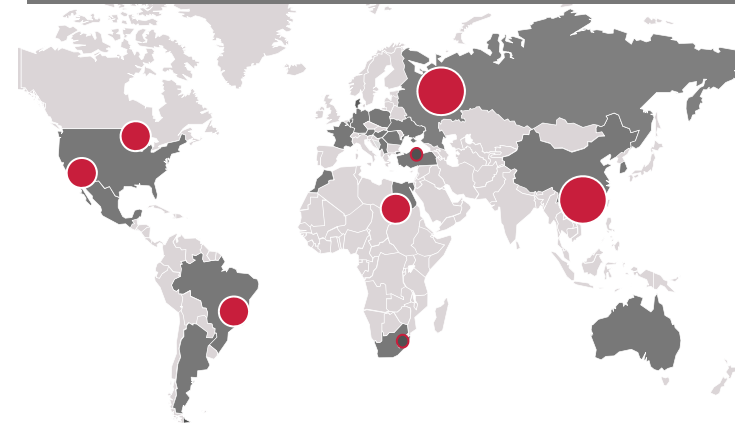

FRUIT PREPARATIONS

- World Market Leader in Fruit preparations global market share > 30%
- While the market's sales volumes of fruit preparations in Europe are stagnating at a high absolute level, the non-European regions are overall showing good market growth rates

FRUIT JUICE CONCENTRATES

- Largest producer of fruit juice concentrates in Europe (AUSTRIA JUICE)
- In general, optimisation measures taken in previous years show their positive effects
- Customer portfolio extended and new markets

25 FRUIT PREPARATION PLANTS & 14 FRUIT JUICE CONCENTRATE PLANTS

- Countries with production sites
- Potential growth regions

FINANCIAL RESULTS FOR H1 2015/16

FRUIT SEGMENT

REVENUE

€m

REVENUE slightly up to € 565.8 million

- Fruit preparations:
 - Sales volume was up slightly compared to last year
 - Moreover, higher sales prices and favourable currency translation effects contributed to revenue growth of about 10 %
- Fruit juice concentrates:
 - Revenue decrease of approximately 20 %
 - Resulted from sharply fallen selling prices for apple juice concentrate

EBIT

€m

EBIT with € 31.2 million less than in the prior year

- Fruit preparations business showed a significant improvement in EBIT
- The lower apple prices of the last campaign and the decline in concentrate prices had a negative impact on margins in the fruit juice concentrate activities
- A positive operating business performance was especially seen in fruit preparations in Europe, North and Latin America and in China/South Korea (also supported by FX effects)

MARKET ENVIRONMENT IN H1 2015/16

FRUIT SEGMENT

FRUIT

- For **fruit preparations** there is an ongoing gentle decrease in demand in the EU, but **slight growth in the non-European markets**
 - Macroeconomic and political problems are, however, slowing market development in the growth regions of Eastern Europe (Russia, Ukraine, Belarus), North Africa (Egypt, Algeria), the Middle East and Argentina
 - Markets such as Brazil, China and Turkey are showing a sustained positive trend
- In the **fruit juice concentrates** division, low apple prices as a result of large crops and of Russia's import ban on fresh fruit from the EU led to a **significant drop in prices for apple juice concentrate** in the marketing year following the 2014 campaign
 - In the past weeks – the 2015 apple campaign started in the middle of September – **selling prices in Europe rose again** as a result of low supplies of raw material
 - The competitive situation for **Chinese apple juice concentrate** remains challenging, and will depend on how the local processing season unfolds
